BARR & SUGDEN'S
DESCRIPTIVE SPRING CATALOGUE
OF
CHOICE SEEDS

-FOR

FLOWER & KITCHEN GARDEN

WITH A COMPREHENSIVE AND CLASSIFIED DESCRIPTIVE LIST OF GLADIOLI, LILIES, IRIS, &c.

SEED BULB & PLANT WAREHOUSE

BARR & SUGDEN,
12, KING STREET, COVENT GARDEN, LONDON, W.C.

"A useful manual for the amateur in the selection of flowers for the adornment of the garden, and vegetables for the use of the table."

Immediate proceedings in Chancery will be taken against all infringements of the Copyright of this Work.

SIMMONS & BOTTEN, PRINTERS, SHOE LANE, FLEET STREET.

2

SPECIAL NOTICES.

- I. The germination of seeds we test under glass, and the purity of the "stocks" we prove at our Experimental Grounds.
- II. Our Novelty List, has, as usual, been carefully compiled, and fairly represents the introductions of merit.
- III. The Gladioli List, p. 67, is given in a classified form, to assist the amateur when selecting. We have again discarded many varieties which are superseded by others of greater merit.
- IV. Our collection of Lilies, p. 68, now represents almost every known variety, and consists of representatives from China, Japan, the Himalayas, the Neilgherries, Cashmere, California, Canada, the United States, British Columbia, the Caucasus, Siberia, the Pyrenees, the Maritime Alps, European Turkey, the Levant, &c.
- V. Our Iris List, p. 71, is arranged in natural groups to facilitate purchasers in making selections. Iris Barbata is one of the grandest decorative plants for the margins of lakes, ponds, and such places, while for wild gardens, shrubberies, and woodland walks it is unrivalled, and as a cut flower for vases it is unsurpassed.
- VI. Miscellaneous Plants are enumerated, p. 74, and a few specialities on page 12 are quoted on account of their importance as hardy plants for the flower garden.
- VII. Carriage is allowed on orders amounting to 2*s.* and upwards, to any principal Railway Station in England and Wales, to Edinburgh and Glasgow, and to any principal Station on the North British, Caledonian and Scottish Central Lines, and to Dublin and Belfast. Also to Cork and Waterford, if by steamboat from London, but only as far as Bristol if by railway, *en route* for Ireland. We prefer sending by rail, as it is more expeditious, and, therefore, unless otherwise instructed, we shall forward via Bristol.
- VIII. *Carriage to be deducted at settlement* in accordance with conditions, Par. VII. Formerly our custom was to pay carriage in London; but we were compelled to relinquish this practice, in consequence of our "Carriage Paid" packages not being delivered with the same promptitude as those not prepaid; and, also, on account of continual complaints from our customers that they also had to pay carriage before they could get the goods. *We mention this as the reason why we abandoned a practice followed by us for so many years.*
- IX. Orders which are paid in advance, if in accordance with Par. VII., can either be sent carriage paid, or a liberal equivalent in goods added. *This latter course will be adopted unless we are otherwise instructed.*
- X. Seeds quoted by us in the Catalogue as at "per packet," we forward post-paid; or if sent by rail, however small the amount, the carriage can be deducted from the remittance at settlement.
- XI. A small charge is made for packages, and, if returned within a fortnight, will be made for the same. It is, however, necessary that the dispatch of the returned empty is notified and the name of the sender written on the label for identification.
- XII. Fruit and Forest Trees, Shrubs, Plants in Pots, Soils, Watson's Lawn Sand, Wirework, Plant Cases and Stands, Gilbert's Hand Lights, Barr's Portable Cut Flower and Bouquet Transmission Cases, Heated Frames, Garden Engines and Water Barrows, Flower Boxes, Jardiniets, and Terra-Cotta, Rustic, China, and Glass goods—on these we do not allow carriage.
- XIII. Five per cent. allowed on payments made within one month from date of invoice, and this allowance is to be deducted from the amount by the remitter.
- XIV. Post Office Orders to be made payable at King-street Post Office, Covent Garden, W.C. All cheques to be crossed, adding the words "and Co." Small amounts may be paid in Postage Stamps; when convenient, however, it is safer to take out a Post Office Order, the charge for which, if under 1*s.*, is a penny.
- XV. Last year the Royal Horticultural Society awarded to us the following Medals:—

April.	Large Gilt Silver Medal for a large Collection of Daffodils, specifically named.
"	Silver Banksian Medal for Plant Cases furnished with Plants.
"	Silver Banksian Medal for Window Decorations.
May.	Commemorative Medals of Her Majesty's opening the Exhibition at South Kensington—viz.: Gold Banksian Medal for a large Collection of Daffodils, including the "Leeds' Seedlings."
"	Silver Banksian Medal for Plant Cases furnished with Plants.
"	Bronze Banksian Medal for Window Decorations.
June.	Silver Banksian Medal for a large Collection of Iris.
"	Silver Banksian Medal for a Collection of Lilies.
"	Bronze Banksian Medal for a Collection of Double Pyrethrums.
- At the Royal Botanic Society's Flower Show in March, being the great Metropolitan Exhibition of Hyacinths, &c., for 1877, we carried off all the first prizes in the open classes for early-flowering Bulbs, viz.:—

First Prize for the best 12 Hyacinths.
" " for the best 12 pots of Tulips.
" " for the best 12 pots of Polyanthus Narcissus.
" " for the largest and finest Collection of Hyacinths.

NOTICES TO FOREIGN AND COLONIAL CORRESPONDENTS.

- XVI. To insure attention, *orders must be accompanied by a remittance, a draft, or an "order to pay,"* on a London agent. The remittance must be sufficient to cover the expense of cases, and also of carriage, if the freight is required to be paid in advance.
- XVII. Seeds can now be despatched to India, at the rate of 1*s.* per lb., in hermetically sealed tin cases, through the Indian Parcels Post, and also in waterproof bags by the ordinary mail at 1*s. 4d.* per lb. Our Indian Customers will kindly notify by which service they wish their postal parcels sent.
- XVIII. In shipping plants to India, great care is exercised by us in selecting, preparing, and properly packing the same, and our consignments have, on the whole, been very successful. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which the plants reach their destination.
- XIX. Our successful shipments of seeds to India have induced several of the Agricultural and Horticultural Societies there to entrust us with the execution of their orders for distribution amongst the members.

DIVISION I.—FLOWER SEEDS, FROM PAGE 4 TO 50.

	Page		Page
The enumeration of Annuals, Perennials,		Collections of	
Ornamental Foliage Plants, &c., commences	14	Morning Glory	9
Climbers, hardy, half-hardy, and tender	45	Pelargoniums, in 6 classes	10
Collections of Asters, in 10 classes	7	Pentstemons	9
" Antirrhinums, in 3 classes	8	Petunias	9
" Balsams, in 3 classes	8	Phlox Drummondii	9
" Carnations, in 11 classes	10	Picotees, in 3 classes	10
" Cockscombs, in 2 classes	8	Poppies	9
" Convolvulus Major	9	Portulacas, in 2 classes	9
" Everlastings, in 5 classes	8	Stocks, in 8 classes	6
" Geraniums, Zonale and Nosegay	10	Tropaeolums	8
" Gourds, in 3 classes	10	Wallflowers, in 2 classes	8
" Grasses, in 5 classes	11	Zinnias, in 3 classes	8
Hollyhocks	9	Flower Seeds by Weight	50
Ipomeas, in 2 classes	9	General Collections selected for Amateurs	13
Larkspurs, in 3 classes	9	Novelties and Specialities for 1878	4
Marigolds	9	Ornamental Grasses	11

Barr's New Heated Frames for Raising Seeds and Striking Cuttings, and Preserving Plants in Winter. See Illustrations and Prices on page 76.

DIVISION II.—VEGETABLE SEEDS, FROM PAGE 52 TO 66.

I. General List of Leguminous Plants, that is, Peas, Beans, &c.	52
II. " Edible-leaved and Edible-flowered Plants, that is, Cauliflower, Cabbage, Spinach, &c.	52
III. " Edible-rooted Plants, that is, Beet, Carrot, Onion, Turnip, &c.	54
IV. " Edible-fruited Plants, that is, Cucumber, Melon, Tomato, Vegetable Marrow, &c.	57
V. " Salad Plants, that is, Celery, Lettuce, Radish, Mustard, Cress, &c.	60
VI. " Herbs, that is, Basil, Savory, Marjoram, Parsley, &c.	62
VII. " Roots, Plants, &c., that is, Potatoes, Asparagus, Artichokes, Sea-kale, Strawberries, &c.	64
General Collections of Vegetable Seeds for Small or Large Families	65

ALPHABETICAL LIST OF VEGETABLES.

Artichoke, Globe	54	Endive	63	Pumpkins, Gourds, or Squashes	61
" Plants	66	French Beans	54	Radish	64
" Jerusalem Roots	66	Garlic	66	Rampion	59
Asparagus Seed	54	Garnishing Herbs	64	Rape	64
" Roots	66	Gooseberry Seed	62	Raspberry Seed	62
Barbe de Capucin	62	Gourds, Pumpkins, or Squashes	61	Rhubarb Seed	57
Beans, Broad, French & Runners	53	Herb Seeds, sweet and pot	64	" Roots	66
Beet, edible leaved	54	" Plants	66	Runner Beans	54
" rooted	57	" Garnishing	64	Savoy Cabbage	57
Borecole, Kale, or Greens	54	Hybrid Sprouts	56	Salsify (Vegetable Oyster)	59
" Garnishing	64	Ice Plant	64	Scarlet Runners	54

Brussels Sprouts	56	Leek	58	Sea-Kale Seed	57
Cabbage	56	Lettuce	63	" Roots	66
" Savoy	57	Love Apple (Tomato)	61	" Beet	66
Capsicum and Chili	60	Mallow, Curled	64	" Cabbage	54
Cardoon	56	Marrow, Vegetable	61	Shallots	57
Carrot	58	Martynia, for Pickling	61	Skirret	59
Cauliflower	57	Melon	60	Sorrel	64
Celery	62	Mushroom Spawn	66	Spinach	57
Chervil	62	Books on The	66	" Beet	54
Corn Salad (Lamb's Lettuce)	62	Mustard	64	Squashes, Gourds, or Pumpkins	61
Chives	66	Nasturtium, for Pickling	61	Strawberry Seed	62
Couve Tronchuda (Sea-Kale Cabbage)	57	Onion	58	Tarragon, Roots	66
Cress, Plain, Curled, Ameri- can, Australian, &c.	62	" Potato or Underground	66	Tomato (Love Apple)	61
Cucumber, Frame	60	" Tree	59	Tree Onion	59
" Ridge	60	Parsnip	64	Turnip	59
Currant Seed	62	Peas	59	Vegetable Marrow	61
Dandelion	62	Potatoes	52	Vines, 7s. 6d. to 15s. each
Egg Plant (Aubergine)	60	Potato Onion	65	Witloof	62
				Yams, Chinese	65

Mixture of Grasses for Lawns, Croquet and Cricket Grounds, Ornamental Parks, &c. page 66

Mixture of Grasses for Permanent Pasture, Meadows, &c. 66

Weed-destroying Lawn Sand for eradicating Daisies, Dandelions, Plantains, &c. 66

DIVISION III.—FARM SEEDS, ETC., PAGES 66 AND 67.

Beet	66	Chicory	66	Mangold Wurzel	66	Sainfoin	66
Broom	66	Furze	66	Mustard	66	Sunflower, for Poultry	66
Buckwheat	66	Gorse	66	Parsley	66	and Game	66
Cabbage	66	Lucern	66	Parsnip	66	Turnip	66
Carrot	66	Kohl Rabi	66				

DIVISION IV.—BULBS, TUBERS, PLANTS, ETC., PAGES 68—75, AND PAGE 12.

Hepatica	12	Lilies	68	Schizostylis	40	Potentillas	75
Christmas Rose	12	Lily of the Valley	74	Delphiniums	75	Funkias	75
Helleborus	12	Tigridias	12	Pyrethrums, Double	12	Anemones	74
Gladioli	67	Tuberous	12	Phlox, Perennial New	75	Flowering Plants	75
Cyclamen	12	Paeonies	75	Sempervivums	75	Hemerocallis	75
Iris	71	Herbaceous Plants	75	Violets, Sweet Scented	12	Foliage Plants	75
Spring Flowering Plants, Ajuga, Arabis, Aubrieta, Auricula, Cheiranthus, Daisy, Forget-Me-Not, Iberis, Pansy, Phlox, Polyanthus, Primrose, Viola, Wallflower, etc. See Bulb Catalogue, page 39.							

NOVELTIES AND SPECIALITIES FOR 1878.

The height is given in inches or feet.

		Per pkt.—s. d.
1	Abronia fragrans, a very remarkable plant, forming large branched tufts from $1\frac{1}{2}$ ft. to 2 ft. in height; the flowers are <i>pure white</i> , produced in terminal and axillary umbels, and emit a vanilla-like fragrance for some distance. The blossoms expand at 4 p.m.	I 0
2	Anchusa angustifolia, a fine biennial, flowers the first year, covered with bright <i>azure-blue</i> flowers	0 6
X 3	Ageratum mexicanum Comte Circuit, producing large bright <i>blue</i> flower-heads, the growth is compact and elegant, $1\frac{1}{2}$ ft.....	I 0
X 4	" dwarf " Unique," a great improvement on Tom Thumb, growth very compact and uniform, with large clusters of rich <i>lavender-coloured</i> flowers, for edgings and bedding most valuable; height 4 to 5 inches	I 0
5	Aquilegia californica hybrida, sepals and spurs <i>orange-red</i> , centre petals fine <i>yellow</i> , a distinct beautiful variety, raised by Mr. Douglas from <i>A. californica</i> and <i>A. chrysanthia</i> , $1\frac{1}{2}$ ft.	I 6
6	" cerulea hybrida, spurs and sepals pale bright <i>blue</i> , central petals clear <i>sulphur yellow</i> , a charming variety, raised by Mr. Douglas from <i>A. caerulea</i> and <i>A. chrysanthia</i> , 1 ft.	I 6
7	Androsacea coronopifolia, a pretty hardy perennial Alpine, effective on rockwork, and producing small tufts of rosette-like flowers.....	I 0
8	Astragalus diphysus, a valuable dwarf hardy perennial with dense terminal heads of <i>blue-purple</i> flowers, each about half an inch long, 1 ft.	I 0
9	Balsam, Barr's "Criterion"; these are the finest type of the double Balsam, flowers large, perfect in form, varied in colour, and many of the flowers beautifully spotted	2s. 6d. &
10	Bartonia aurea nana; few hardy annuals are more decorative than <i>Bartonia aurea</i> ; its large <i>golden-yellow</i> flowers and elegant foliage are very attractive. The variety offered is dwarf, being 8 to 10 inches high, and on this account its value over <i>B. aurea</i> is greatly enhanced	3 6
11	Begonia, embracing all the newest and choicest tuberous-rooted varieties, valuable alike for pot culture and for bedding out. Seedlings are decorative the first season	2s. 6d., 3s. 6d. &
12	Calceolaria, embracing the finest large-flowered and most beautifully spotted varieties, and in respect to growth, compact and floriferous	2s. 6d. &
13	Campanula glomerata speciosa, a distinct and very decorative hardy perennial	6d. &
14	" macrostyla, a remarkably handsome annual species with a candelabrum-like closely-branched growth, boldly crowned by upright symmetrically cup-shaped flowers of great substance, $1\frac{1}{2}$ inches across, which are regularly reticulated with violet upon a white ground, 15 inches	1s. &
15	Speculum flore pleno, a new double variety of <i>Venus' Looking Glass</i> , which the introducer describes as most charming, $\frac{1}{2}$ ft.	2 6
16	Candytuft, New carmine-flowered, the plant is of good habit, and the colour of the flower is vivid, rich, and beautiful	I 0
17	" New hybrids, <i>blush</i> , <i>rose</i> and <i>white</i> , in mixture. These are very elegant, compact, and remarkable for their brilliancy of colour, and profusion of blooms, $\frac{3}{4}$ ft.	6d. &
18	" new hybrid <i>rose</i> , for small beds, edgings and lines, the most attractive of the family, 6d. &	I 0
19	" new hybrid <i>white</i> , for small beds, edgings and lines, the finest of white Candytuft, 6d. &	I 0
20	White Tom Thumb, very robust, branching, close-growing, and floriferous, 1 ft.	6d. &
X 21	Canterbury Bells, Dean's new strain; fourteen distinct varieties, double and single, in mixture, remarkable for size of flowers and variation of colour	6d. &
22	Celosia pyramidalis, including all the new varieties in mixture; a charming pot plant for the decoration of the conservatory in autumn	1s. &
X 23	Centauraea rutifolia, a valuable silvery white foliage plant, in the way of <i>C. candidissima</i> . It is from the Balkans, and is described as suffering less from rain than <i>C. candidissima</i> ; the flowers are <i>pure white</i> , and very abundant; altogether a first class plant	2 6
24	Chlorogalum pomeridianum, an interesting Californian Lily-wort; the plant forms a large bulb, and throws up a tall slender branching stem, with <i>white</i> flowers, about an inch across, and which expand in the afternoon (Bulb. 1s. 6d. each).....	2 6
25	Cineraria hybrida, Covent Garden variety, dark <i>blue</i> , $1\frac{1}{2}$ ft.	I 0
26	" " " light <i>blue</i> , $1\frac{1}{2}$ ft.	2 6
27	" " " bright <i>crimson</i> , $1\frac{1}{2}$ ft.	2 6
28	" " " blue, tipped <i>white</i> , $1\frac{1}{2}$ ft.	2 6
29	" " " crimson, tipped <i>white</i> $1\frac{1}{2}$ ft.	2 6
30	" " " mixed from above	2 6
31	Cockscomb, Covent Garden dwarf <i>crimson</i> : the combs from which seed was saved of this remarkably fine selection measured 2 feet, and close down upon the pot	1s. &
32	Cuphea Roezlii grandiflora superba, flowers bright <i>scarlet</i> , and as large as <i>C. miniat</i> ; a fine plant for the winter decoration of the conservatory, 1 ft.	I 0
33	Cyclamen Persicum grandiflorum, colours ranging from the purest <i>white</i> to the richest <i>magenta</i> , and remarkably large robust flowers which are thrown well above the foliage	3s. 6d. &
34	Dahlia cocinea flora aurea; the <i>golden</i> flowers of this single Dahlia form a fine contrast to the beautiful species on page 24, 3 ft.	5 6
35	" gracilis, an elegant species of the single-flowered Dahlia, with bright <i>orange-scarlet</i> flowers, rising well above the foliage, 3 ft.	I 0
36	" choice mixed single spec es; these are exceptionally beautiful free-flowering plants, far surpassing the double varieties for effect in the flower border, and to cut for vases	I 0
X 37	Delphinium cashmerianum; this is, perhaps, the finest of the family; the flowers are as large as <i>D. formosum</i> . It attains a height of from 1 to 2 ft., and an established plant, will produce several hundreds of flower spikes. A figure of it may be seen in the Bot. Mag. ... 1s. &	2 6
38	" truncatum, 3 ft. in height, with long trusses of small dark shining <i>blue</i> flowers.....	2 6
39	" vestitum, pale <i>blue</i> , a very distinct species, the flowers being woolly and hairy	I 0
40	Dianthus, New Japanese, "Crimson Belle," rich vivid <i>crimson-lake</i> flowers, extremely large, and evenly and finely laciniated, 1 ft.	I 6
X 41	" New Japanese, "Eastern Queen"; beautifully marbled with broad bands of rich <i>mauve</i> , upon a paler surface, strikingly beautiful, 1 ft.	I 6

Per pt.—s. d.

42	<i>Erica cordonodes</i> ; the seed of this most charming hardy heath has been sent to us by the Hon. and Rev. J. Townsend Boscowen. It is figured in the <i>Gardeners' Chronicle</i> , April 14th, 1877, where an article on the plant is given by the Editor, and an extract from the <i>Botanical Register</i> by Dr. Lindley. This valuable plant seems to flower more or less during the whole year. From time to time, Mr. Boscowen has sent to us beautiful pieces of the plant, densely covered with flowers, during the winter and spring months; and at the Meeting of the Royal Horticultural Society in December, Mr. Parker, of Tooting, exhibited this plant in his collection of hardy flowers.....	I	0	
43	<i>Eriogonum umbellatum Silleri</i> , a superior variety of <i>E. umbellatum</i> , more vigorous in growth, flowers larger, of a deeper yellow, produced from a fortnight to three weeks later than the type, $\frac{2}{3}$ ft.	I	0	
44	<i>Eryngium yuccaeifolium</i> , a characteristic plant, the foliage during summer resembling a small <i>Yucca</i>	I	0	
45	<i>Erythrina acanthocarpa</i> , a rare species from Caffraria	I	6	
X 46	<i>Eschscholtzia</i> "Mandarin"; the buds and exterior of the flowers are bright scarlet and the interior rich orange; it is a gorgeously coloured hardy annual, 1 ft.	2	6	
47	<i>Eulalia japonica</i> , a magnificent Japanese grass, majestic and graceful, effective as a specimen plant, the large white central veins contrasting with the rich green of the elegant foliage, 7 to 12 ft.	I	0	
48	<i>Geum atrosanguineum flore pleno</i> ; this is a fine double form of the old favourite plant, scarlet <i>Geum</i> , and will be highly appreciated by those who cultivate hardy herbaceous perennials, 1 ft.	I	0	
49	<i>Godetia</i> , Lady Albemarle; the intense glowing carmine-crimson, and the compact close branching habit and profuse blooming of this plant entitles it to the first place amongst hardy annuals, 1 ft. 6d. &	I	0	
50	<i>Grass, Eragrostis oxylepis</i>	I	0	
51	<i>Eriochloa sericea</i>	<i>These are a bouquet of ornamental Grasses from the United States, and we hope they will be acceptable to the cultivators of grasses for the ornamentation of epergnes, vases, etc.</i>	I	0
52	<i>Greenia arkansana</i>		I	0
53	<i>Panicum virgatum</i>		I	0
54	<i>Tricpus acuminata</i>		I	0
55	<i>Hypericum tomentosum</i> , a fine species, with woolly leaves	I	0	
56	<i>Ipomoea leptophylla</i> ; this is a very characteristic plant, the flowers are of a pleasing rose-purple colour, and the plant being of a compact growth, it resembles an immense bouquet. It is found on the Canadian rivers and the table-lands of Colorado, where the winter temperature is down to 20° or 30° below zero	I	0	
57	<i>Iris Kämpferi</i> , from the choicest varieties. For plants of these see p. 29. During the past summer we flowered a great many seedlings of this Iris, three of which were certificated by the Royal Horticultural Society	1s. &	2	6
X 58	<i>Liatris</i> , the Kansas Gay Feather. See p. 30.	I	0	
59	<i>Lilium Dalmaticum</i> ; the flowers of this magnificent Lily are of the richest glossy crimson-purple, and produced in large numbers	1s. &	2	6
X 59	<i>Littonia modesta</i> , a charming greenhouse plant, profusely covered with small bright yellow pendulous blossoms	I	0	
60	<i>Lobelia speciosa</i> , Blue Beauty, the finest blue bedding Lobelia in cultivation, $\frac{1}{2}$ ft.	1s. &	2	6
61	" <i>Crystal Palace compacta</i> , saved from carefully selected plants, $\frac{1}{3}$ ft.	1s. &	2	6
62	" <i>Erinus grandiflora rosea</i> , large pure rose coloured flowers, very pretty, $\frac{1}{2}$ ft.	1s. &	2	6
63	" <i>pumila grandiflora</i> , saved from carefully selected plants, $\frac{1}{3}$ ft.	1s. &	2	6
64	" <i>magnifica</i> , deep lilac-blue, the finest of the Pumila section, $\frac{1}{4}$ ft.	1s. &	2	6
65	<i>speciosa</i> "The Bride," pure white, dwarf compact growth and floriferous, $\frac{1}{2}$ ft.	1s. &	2	6
66	<i>Malcolmia bicolor</i> , this is an old hardy annual, but scarcely known in cultivation, for carpet beds it is most valuable. The seed may be sown from January under glass, potted on and then planted out. It soon covers the ground with its foliage, and continues throughout the summer covered with white flowers. The appearance of the plant is not unlike <i>Ionopsis acaule</i> , $\frac{1}{2}$ ft.	6d. &	I	0
67	<i>Mentzelia ornata</i> , a robust <i>Bartonia</i> -like plant, with large creamy white flowers 4 to 5 inches in diameter, very ornamental	I	0	
X 68	<i>Matricaria eximia flore pleno</i> , var. <i>crispata</i> , this is a variety of the Old Double White Pyrethrum, with the foliage beautifully curled, which greatly enhances its effect in the flower border, $1\frac{1}{2}$ ft.	I	0	
69	<i>Mignonette</i> , dwarf red, this is a very distinct dwarf, compact-growing variety with highly coloured flowers, which are produced in great profusion admirable for edgings and pot culture	I	0	
70	" <i>Miles's New spiral</i> , this is a remarkably fine variety, very robust, profuse flowering, and very fragrant, for pot culture it is most desirable	I	0	
71	" <i>pyramidalis gigantea</i> , this is perhaps the highest type of the cultivated Mignonette; it is an improved form of the variety which attracted so much attention at the Paris International Exhibition of 1866. For pot culture it is exceptionally fine	2	6	
72	<i>Mimulus</i> , choice large-flowered varieties; the seed was saved from a collection of the most beautifully marked and variously coloured flowers	1s. &	2	6
X 73	<i>Mirabilis multiflora</i> , figured in the <i>Bot. Mag.</i> of 1876. This species of Marvel-of-Peru differs from the ordinary variety of our gardens in being a diffuse trailer, much branched, and with heart-shaped rather pointed foliage; the flowers are produced both from the extremities of the branches and from their upper axils, and arise from a cup-shaped involucrum, about an inch long, four to six blossoms from each, the funnel-shaped calyx, 2 inches long, mauve coloured and Ipomea-like	I	0	
74	<i>Pansies</i> in mixture, including all the finest varieties for spring decoration	1s. &	2	6
75	<i>Pansy</i> , new bedding varieties. See <i>Viola Tricolor</i> , page 44.	I	0	
75	<i>Papaver umbrosa</i> ; this is an elegant annual, flowers intense crimson, each petal having a conspicuous black spot; a grand plant for beds and borders	6d. &	I	0
76	<i>Pentstemon Cobaea</i> (true), from the United States, flowers very large, broadly bell-shaped, and about 2 inches long, of a purplish white colour, a splendid hardy perennial	I	0	
77	<i>Petunia hybrida compacta elegansima</i> , compact in growth, and profuse-flowering, 10 to 12 inches high, 14 to 15 inches in diameter, flowers various in colour, highly recommended for beds ...	2	6	
78	<i>Petunia hybrida</i> , large-flowered, striped; this strain of Petunias is recommended for their finely shaped flowers, excellent habit, and rich colours; many of them are margined and spotted, and beautifully laciniated, $1\frac{1}{2}$ ft.	1s. &	2	6
79	<i>Petunia</i> , the choicest varieties in mixture including selfs, striped, and spotted sorts	1s. &	2	6
80	<i>Phlox Drummondii coccinea striata compacta</i> , flowers brilliant scarlet, striped white, $\frac{2}{3}$ ft.	1s. &	2	6
81	" large flowered varieties, in mixture, very beautiful	1s. &	2	6
82	<i>Platycodon grandiflorum</i> , a fine hardy perennial	I	0	
83	<i>Polyanthus</i> , beautifully laced varieties	1s. &	2	6
84	<i>Portulaca</i> , double, in mixed colours, a charming plant for dry, hot, sunny situations	1s. &	2	6
85	<i>Primrose</i> , choice mixed varieties, very beautiful	1s. &	2	6
86	<i>Primula sinensis</i> , in mixture, embracing all the newest varieties in colour, also the finest types of the Covent Garden red and white varieties	2s. 6d. &	3	6

Per pkt.—s. d.

87	Primula Sinensis double, in mixture, from six varieties	3s. 6d. &	5 6
88	" fern leaved varieties, in mixture, of several colours		2 6
99	Pyrethrum aureum laciniatum, the Golden Feather, with gracefully cut foliage	1s. &	2 6
90	Rubus crataegifolius, a fine shrub, producing bright scarlet berries in great abundance		1 0
91	Sabbatia Chloroleoides, one of the prettiest of the North American Flora. It is found in marshy places, and on the margins of ponds, from Massachusetts southward; its handsome deep rose coloured flowers are 2 inches in diameter, and produced in loose panicles. It will require the treatment of a half-hardy annual, but may possibly prove of biennial duration; height 1 to 2 ft.		1 0
92	Salvia coccinea nana rosea grandiflora, the flowers are of a bright shining scarlet-rose, habit dwarf and bushy, and blooming profusely, 1 ft.		1 0
93	Salvia Moorcroftiana, a fine Himalayan species of pyramidal growth, about 3 ft., the foliage 2½ ft. long and 9 in. across, flowers very numerous, small, and of a bluish white colour; a fine plant for single specimens on the lawn and flower border		1 0
94	Saponaria calabrica pumilla, the extremely dwarf compact habit, 3 in. high, of this very pretty plant makes it valuable for edgings and small panel beds		1 0
95	Stellaria graminea aurea, the golden-leaved chickweed for carpet bedding	1s. &	2 6
96	Stobea purpurea, fine hardy perennial of distinct aspect, foliage prickly, bearing large flower heads, not unlike Gaillardia, but of a pale violet tint, the base deep purple; it flowers from seed the first season, and is perfectly hardy on light soils, where it continues flowering for a long time, 2 ft.	1s. &	2 6
97	X Stock, New Giant White Brompton, this fine variety bears massive spikes of double flowers, 3 ft....		1 0
98	Sweet Pea, Violet Queen, this is remarkable for its dwarfer habit than the ordinary Sweet Pea, the flowers ranging in colour from deep mauve of the keel to light violet of the guard petals, and described by the introducer as suggestive in its effect of the coloured bracts of the Bougainvillea ...		1 6
99	X Teosinte reiana luxurians, this is a highly ornamental grass, of gigantic proportions, from Central America, resembling Indian corn, and producing a great number of shoots 3 to 4 yards high and thickly covered with leaves. In its native country a single plant is said to produce sufficient forage to supply two cattle for twenty-four hours. The seed should be sown under glass in spring, and planted out in May for subtropical effect	1s. &	2 6
100	Thymophylla aurea, a neat small annual from Colorado, growing in branched tufts, 4 inches high, and 6 to 9 inches in diameter, with terminal flower heads resembling a miniature single Marigold, colour bright yellow	1s. &	2 6
101	X Umbilicus Sempervivum; this charming novelty was introduced by Kotskhy from Kurdistan some few years back, but has not been introduced into commerce till this season. The entire stock of seed has been placed in our hands for distribution. The plant is a form of Sempervivum, and perhaps the most charming of the House-leek family. It is small and remarkably neat, and will be found valuable for carpet beds, neat edgings, and for rockwork. The seed should be sown under glass, and then planted out. The second year, if the weather is favourable, it will flower, producing a large umbel, 6 inches high, of blood-red flowers not unlike Rochea falcata, but much darker. At the time of flowering the whole plant changes to red	1s. &	2 6
102	Verbena hybrida candidissima, flowers pure white, and produced in large trusses; the introducer considers it will supersede all existing varieties	1s. &	2 6
103	" " blue-black with white eye; the flowers are large and numerous, the colour rich and distinct		2 6
	Violas, new bedding varieties. (See p. 44.)		
104	Violas bedding varieties, in mixture, embracing all the newest kinds	1s. &	2 6
105	Virginia Stock, Crimson King, a richly coloured variety of this favourite dwarf annual	6d. &	1 0
106	Viscaria cardinalis fulgens, intense crimson-magenta flowers and fine habit, 1 ft.	6d. &	1 0
107	" grandiflora, flowers large and brilliantly coloured magenta, 1 ft.		1 0
108	" cerulea nana, a dwarf variety, with pretty light blue flowers, ¾ ft.		1 0

COLLECTIONS

Of Stocks, Asters, Wallflowers, Balsams, Carnations, Pelargoniums, Etc.

DOUBLE STOCKS.

In our Experimental Grounds the following varieties of Stocks have proved to be the most distinct and decorative. They are of various heights, and suitable to the different styles of Gardening for which the Stock is so admirably adapted. All are desirable pot-plants, and are greatly prized as cut flowers, both for their diverse colours and fragrance. For a continuous succession of bloom, seed should be sown at intervals from the beginning of March to the end of May; the first sowings under glass, the later sowings may be made where the plants are intended to bloom.

Large-flowering German Dwarf Ten-Week Stock, height 1 ft.

For medium or large-sized beds either of one colour, or assorted colours, this is the best variety; it is of compact, branching, robust growth, with large flowers produced in great profusion.

		s. d.		s. d.
200	16 Splendid varieties	3 6	207	Splendid white, sufficient for a large bed ...

ASTERS.

In our Experimental Grounds we have grown a complete collection of Asters to ascertain the merits of recent introductions, and have discarded the "Humboldt," the "Shakespeare," the "Bismarck," the Improved Rose, the "Schiller," and the "Grace" Asters, as possessing no distinctive character, and of less merit than those retained in our list.

For large beds, the Hamburgh Prize Paeony Perfection, the Victoria, the Cockade, and the Hedgehog, are the most desirable. For medium-sized beds, ribbons, etc., the Dwarf Chrysanthemum, the Dwarf Victoria, and the German Emperor are the finest, being compact, and of even growth, bearing their flowers conspicuously above the foliage. To cut for bouquets, the Imbrique Pompon, and the Dwarf Bouquet Elegantissima, are the most exquisite flowers, ranging from the most miniature to the size of a Pompon Chrysanthemum.

The Aster, when in bloom, is frequently lifted, potted, and used for conservatory decoration. For a continuous succession of bloom, seed should be sown at intervals from the beginning of March to the end of May; the first sowings under glass, the later sowings may be made where the plants are intended to flower.

From our Continental Grower we have received the following communication:—"Aster crop is again short, owing to a few days' severe weather in October, which did much damage, especially to the late flowering kinds. The growth of these seeds will be tolerably good, but it cannot be expected to attain an average."

Paeony Perfection Hamburgh Prize Aster, height 1½ ft.

The varieties are of the highest type of the Paeony Section as recognized by the Royal Horticultural Society. The habit of the plant is excellent: the flowers are remarkable for their fine quality and perfect form, their large size, and rich pure colours. For exhibition purposes they are indispensable, and were awarded the Prize for Paeony Asters at the Hamburgh Exhibition.

CONVOLVULUS MAJOR, OR THE AMERICAN MORNING GLORY.

The *Convolvulus Major* is perhaps one of the most attractive objects where climbers are cultivated. Whether on the trellis, the verandah, or rambling amongst the branches of shrubs, or festooning the hedgerows, alone, or with other climbers, such as *Tropaeolum Canariense* (Canary Creeper), *Clematis*, etc., its beauty is conspicuous, and the effect of its fresh rich pleasing colours is most charming. Pyramids of twiggy faggots in floral walks are charming when covered with these and Sweet Peas.

LARKSPURS.

These are universal favourites, and of considerable value in the flower garden. The dwarf varieties are very effective in beds and ribbons; the taller growing kinds are exceedingly decorative in mixed flower and shrubbery borders, and to cut for bouquets and vases they are invaluable. On light soils, where plants get burnt up in summer, we recommend that seed be sown in autumn; so treated they will bloom throughout the whole summer in spite of the severest drought, and cut flowers may be gathered freely from them the whole of the season.

New Dwarf Stock-flowered Rocket Larkspur, height 1 ft.

The finest type of the dwarf Rocket Larkspur. Well cultivated it produces large handsome spikes of bloom.					
365 10	Splendid varieties	1s. 6d. & 2 6	366	Splendid mixed, sufficient for a large bed...	1 0

-------	--------------------------	-----	-----	------------------------------	-----------

PETUNIAS.

The Petunia in the flower garden, is one of the most effective of plants, blooming profusely till far on in the autumn. When planted in large beds it should be trained over a frame-work of boughs; and in the flower borders, against twiggy faggots. But perhaps the plant is most telling in effect when trained against a rustic fence, on espaliers, or against a wall. In rustic baskets on the lawn, for rockwork, or elevated situations, where plants are required to drop over, as in the fissures of rock formations, this plant is invaluable.

ORNAMENTAL GRASSES,

For Winter Bouquets, Dinner-Table Decoration, Edgings, Ribbons, Centres of Beds, Sub-tropical Gardens, Islands, Select Plantations, Shrubberies, the Sides of Rivulets, Ravines, Lakes, etc.

It is scarcely possible to over-estimate the decorative qualities of Ornamental Grasses, some are curious-looking plants, others exceedingly graceful; some neat and compact, others stately and majestic. *Agrostis elegans* and other slender growing varicities brought forward in pots, and interplanted with flowering plants in beds, the effect is exceedingly pleasing.

All the grasses may be gathered and dried for winter decoration; but as some are better adapted for that purpose than others, we therefore recommend the collection quoted for "Winter Bouquets."

In some establishments a special piece of ground is devoted to an Ornamental GRASS GARDEN, which frequently is a source of greater interest than the flower garden with all its embellishments.

422 Collections suitable for Flower Borders, 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

423 " " for Edgings, 10 varieties, 2/6; 6 ditto, 1/6.

424 " " for Shrubberies, etc., 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

425 " " for Winter Bouquets, 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

426 " " for Sub-tropical Gardens, 15 varieties, 4/6; 10 ditto, 2/6.

All the grasses are decorative the first season, and may either be sown where intended to remain, or in pots, and transplanted when about two inches high.

FIRST SECTION.—*Most of those enumerated are useful for bouquets, and all are elegant in the flower border.*

The price is 3d. per packet, except those marked *, which are 6d. —

510 " " roseum, rose tinted, 7 ft.

511 " " *variegatum, foliage va-

riegated, 7 ft.

512 " " violaceum, violet tinted, 7 ft.

ORNAMENTAL GRASSES,

For Winter Bouquets, Dinner-Table Decoration, Edgings, Ribbons, Centres of Beds, Sub-tropical

Gardens, Islands, Select Plantations, Shrubberies, the Sides of Rivulets, Ravines, Lakes, etc.

It is scarcely possible to over-estimate the decorative qualities of Ornamental Grasses, some are curious-looking plants, others exceedingly graceful; some neat and compact, others stately and majestic. *Agrostis elegans* and other slender growing varicities brought forward in pots, and interplanted with flowering plants in beds, the effect is exceedingly pleasing.

All the grasses may be gathered and dried for winter decoration; but as some are better adapted for that purpose than others, we therefore recommend the collection quoted for "Winter Bouquets."

In some establishments a special piece of ground is devoted to an Ornamental GRASS GARDEN, which frequently is a source of greater interest than the flower garden with all its embellishments.

422 Collections suitable for Flower Borders, 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

423 " " for Edgings, 10 varieties, 2/6; 6 ditto, 1/6.

424 " " for Shrubberies, etc., 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

425 " " for Winter Bouquets, 30 varieties, 7/6; 20 ditto, 5/6; 15 ditto, 3/6; 10 ditto, 2/6.

426 " " for Sub-tropical Gardens, 15 varieties, 4/6; 10 ditto, 2/6.

All the grasses are decorative the first season, and may either be sown where intended to remain, or in pots, and transplanted when about two inches high.

FIRST SECTION.—*Most of those enumerated are useful for bouquets, and all are elegant in the flower border.*

The price is 3d. per packet, except those marked *, which are 6d. —

Agrostis. All fine graceful bouquet grasses.

427 " elegans, exquisitely graceful, 1 ft.

428 " laxiflora, very graceful, 1½ ft.

429 " nebulosa, the perfection of grace, 1½ ft.

430 " Stevenii, graceful, 1 ft.

431 " verticillata, elegant, 1 ft.

432 *Andropogon Ischænum*, slender growing, 1 ft.

433 *Anthoxanthum gracile*, elegant, ½ ft.

434 *Avena sterilis*, the Animated Oat, 2½ ft.

435 *Brachypodium platystachyum*, graceful, 2 ft.

Briza. Charming varieties of Quaking Grass.

436 " compacta, very charming, 1 ft.

437 " major, large Quaking Grass, 1 ft.

438 " geniculata, spreading, 1 ft.

439 " gracilis, small Quaking Grass, 1 ft.

440 *Brizopyrum Sicutum*, for edgings & bouquets, 3 ft.

441 *Bromus briziformis*, elegant *Briza-like*, 1 ft.

442 " macrostachys, fine border grass, 1½ ft.

443 *Ceratochloa pendula*, graceful, 1 ft.

444 **Chascolytrum erectum*, fine *Briza-like* spikes, 2 ft.

Chloris. Singularly radiated, and very effective in bouquets and borders.

445 " barbata, bearded, 1 ft.

446 " cucullata, for edgings and bouquets, ½ ft.

447 " elegans, slender and elegant, ½ ft.

448 " myriostacha.

449 " radiata, radiating, 1 ft.

450 " submutica, spreading.

451 " truncata, elegant for bouquets, 1½ ft.

452 *Chrysurus aureus*, golden-spiked, ½ ft.

453 *Coix lachryma*, Job's tears, 1½ ft.

Eleusine. Pretty. All curiously horned grasses, effective in bouquets and borders.

454 " coracana, spreading, 1 ft.

455 " Indica, spreading and graceful, 1 ft.

456 " oligostachya, three horns, 1 ft.

457 *Elymus Caput-Medusæ*, graceful & distinct, 1 ft.

Eragrostis, elegant for borders and bouquets.

458 " cylindriforma, most graceful, 2 ft.

459 " elegans (*Love Grass*), fine, 1 ft.

460 " *Namaquensis*, dwarf spreading.

461 " oxylepis, very graceful, 1½ ft.

462 " Purshii, very elegant, 1½ ft.

463 **Eriochloa cericea* (new).

Festuca. Dwarf, compact-growing grasses.

464 " pectinella, for bouquets & edgings, ½ ft.

465 " rigida, elegant for jardiniets, 1 ft.

466 " viridis, fine edging plant, ½ ft.

467 *Grangea Maderaspatana*, elegant & curious, 1½ ft.

468 **Greenia Arkansana*, very beautiful.

469 *Hordeum jubatum*, elegant for bouquets, 1½ ft.

470 **Isolepis gracilis*, elegant for jardiniets, ½ ft.

471 *Lagurus ovatus*, *Hare's-tail*, very elegant, 1 ft.

472 *Lappago racemosus*, curious-looking grass, 1 ft.

473 *Lasiagrostis splendens*, beautiful, ¾ ft.

474 *Leptochloa gracilis*, pretty, 1½ ft.

475 *Melica pennicillaria*, graceful for bouquets, 1½ ft.

Panicum. Suitable for bouquets and borders.

476 " capillare, most elegant, 2 ft.

477 " colonum, pretty, 1½ ft.

478 " crus-galli, effective, 1½ ft.

479 *Paspalum elegans*, pretty for borders, 2 ft.

Pennisetum. The most distinct and beautiful of ornamental grasses.

480 " cenchroides, 1 ft.

481 " distylum, ½ ft.

482 " fimbriatum, 1 ft.

483 " longistylum, 1½ ft.

484 " setosum, covered with silky hairs, brilliant as rubies, 1½ ft.

485 *Piptatherum Thomasii*, a very graceful grass, 1 ft.

486 *Setaria macrochaeta*, elegant, 1½ ft.

487 **Spergula pilifera*, for rock-work, ½ ft.

Stipa. Of all grasses the most elegant in the flower border, and fine for bouquets.

488 " elegansissima, extremely elegant, 2 ft.

489 " intricata, very elegant, 2 ft.

490 " papposa, 2 ft.

491 " pennata (*Feather-grass*), 2 ft.

492 " tortilis, very pretty, 2 ft.

493 *Tricholæna rosea*, exceedingly pretty, 1 ft.

494 " violacea, 1 ft.

495 **Tricuspidis acuminata* (new), very fine.

496 *Tripsacum dactyloides*, pretty for edgings, ¾ ft.

497 *Uniola latifolia*, very beautiful in bouquets, 3 ft.

498 *Glycerium argentinum*, mixed varieties, 7 ft.

499 *Panicum palmifolium*, 3 ft.

500 *Panicum virgatum*, 4 ft.

501 *Penicillaria spicata*, leaves like the maize, 5 ft.

502 *Saccharum cylindricum*, silky panicles, 3 ft.

503 *Maddenii*, resembles *Erianthus*, 5 ft.

Sorghum. Majestic sub-tropical plants.

504 " *halepense, elegant, 5 ft.

505 " nankinense, bronzed plumes, 5 ft.

506 *Tripsacum monostachyum*, drooping leaves and cylindricat spikes of inflorescence, 5 ft.

Zea (Maize or Indian Corn). Valuable sub-tropical

*plants, *Japonica* is prized for its beauti-*

*fully variegated foliage, *Cuzko* and *Car-**

agua for their majestic growth.

507 " *blanc doux ride des Etats.

508 " *geant hybride precoce.

509 " *japonica variegata, striped Maize, 3 ft.

510 " *Caragua, Giant Maize, 10 ft.

511 " *gracillima, Miniature Maize, 2 ft.

A FEW SPECIALITIES IN PLANTS.

NEW DOUBLE-FLOWERED PYRETHRUMS IN POTS.

These are the most beautiful of hardy herbaceous plants, the flowers range from the purest white to the deepest crimson, and as perfect in form as the Aster. The foliage is graceful, and the habit of the plant excellent; the time of flowering, May and June, and again in September and October. To cut for table bouquets the flower is all that could be desired. *For Descriptive List of Pyrethrums, see Bulb Catalogue, p. 41.*

527 50 in 50 varieties	5s. 6d.	529 12 in 12 varieties	9s. 12s., and 18
528 25 in 25 "	25s. to 40	530 6 in 6 "	5s. 7s. 6d., and 9

HARDY CYCLAMEN ESTABLISHED IN POTS.

Cyclamen Europaeum we import from the Alps. It is a delightfully fragrant species, and we strongly recommend their extensive culture on rockwork, the bottom of old walls, in wild gardens, etc. Grown roots, 25s. per 100.

Cyclamen hederifolium and its variety Gracum have beautiful Anectochilus-like variegated foliage, which is decorative throughout the autumn and spring months, and is uninjured by the most unfavourable weather. As winter bedding plants, associated with Scilla bifolia, Scilla Sibirica, and Snowdrops, the effect is perfect; preceding these spring flowers in autumn come the Cyclamen blossoms in rich profusion.

531 Hardy Cyclamen, Autumn, Winter, and Spring flowering, assorted varieties, per doz.	15s. & 21s.	each-s. d.
--	-------------	------------

532 Atkinsi, white, crimson centre	1s. 6d. to 2	540 Hederaefolium album, pure white, 1s. 6d. to 2	6

537 " carneum	1s. 6d. to 2	Macrophyllum, blush white	6
538 Europaeum, red, very fragrant	1s. to 1	Repandum, bright red	6
539 Hederafolium, rosy pink	1s. 6d. to 2	Vernum, rich rose, strong roots	6

CYCLAMEN PERSICUM IN FLOWER.

Cyclamen Persicum and its varieties are charming indoor plants, and succeed at a very low temperature, such as a cool greenhouse or even a cold frame with a little protection. They also thrive and make vigorous plants in a stove or orchid house, and in London they form one of the principal decorative plants in Winter and Spring.

546 Large flowered Prize varieties; fine plants in bloom, 24s., 30s., 42s. per doz.; 2s. 6d. and 3s. 6d. each.	
--	--

Larger specimen plants for Exhibition, 5s. 6d., 7s. 6d., 10s. 6d., 12s. 6d., 15s., and 21s. each.

VIOLETS, SWEET SCENTED.

These universal favourites are indispensable even in the smallest garden; their delicious and gratefully fragrant flowers are freely produced, and may be gathered almost daily throughout the winter and spring.

547 Arborea (True Violet), double blue	0 9	558 Rubra plena, pale red, double	0 9	each-s. d.

569 One each of the collection		12 6		

HELEBORUS (CHRISTMAS ROSE).

Few flowers during winter are more prized than the Christmas Rose. Established masses of Helleborus niger, maximus, and minor, slightly protected when in bud, the blossoms expand with a purity as spotless as snow. Maximus is remarkable for the largeness of its flowers, robust dark green foliage, and early blooming.

570 Niger, white, per doz., 9s., 12s., 18s., 25s., and 30s. each; 1s., 1s. 6d., 2s. 6d., 3s. 6d.; very large plants, 5s. 6d.	each-s. d.	572 Niger minor albus, white	1s. 6d. & 2	6

579 Double red, plants ..per doz., 6s. to 9s.	0 9	583 Angulosa, large, rich blue	1s. 6d. to 2	6

DOUBLE TUBEROSES, ITALIAN AND AMERICAN.

The flowers of the Tuberose resemble the much-prized Stephanotis, but more fragrant, and as they are perfectly double, are more generally useful. If planted in succession from the 1st of January till September, a constant supply of cut flowers may be had from May to January, and the conservatory during these months perfumed with the most delicious fragrance.

584 Tuberose, double Italian, per doz., 3s. 6d. o 4	each-s. d.	586 Tuberose, double American, per doz., 5s. 6d. o 6	each-s. d.

588 Tuberose, The Pearl, a new dwarf American variety, flowers superbly double...per doz., 9s. each	1 0		

TIGRIDIA.

It may be questioned if any orchid equals in beauty the Tigridia, or elicits so much admiration. Plant for succession in March, April and May in good light soil, and flowers may be gathered daily for months.

589 Canariensis, yellow, spotted scarlet, 1 ft. 3 6	per doz.-s. d.	591 Pavonia, scarlet and orange, 1 ft.	3 6
590 Conchiflora, yellow, spotted scarlet, 1 ft. 3 5		592 Speciosa, dark scarlet and orange, 1 ft.... 4 6	

PAXTONIAN ASSORTMENTS OF FLOWER SEEDS.

SENT POST-PAID.

These collections consist of the varieties which are the most beautiful and effective, and best adapted for the purposes indicated. Amateurs who are unacquainted with the most suitable selections, should order from the undermentioned, quoting the numbers, and they will be supplied with assortments best calculated to maintain throughout the summer and autumn months a rich and gay floral display.

(The best uncoloured illustrated work on popular plants is Vilmorin's "Atlas of Flowers." See p. 14.)

723	mixed, including many choice species.....	1s. & 2 6
724	," including many fine species.....	6d. & 1 0

ACAN'THUS, Nat. Ord. *Acantha'ceæ*. Handsome hardy perennials.

Picturesque ornamental foliage plants, effective on lawns, in sub-tropical gardens, and flower borders.

725	Acanthus candela'brum, pink, leaves bright glossy green, 3 ft.	0 6
726	," latifoli'us, (lusitanicus) white, foliage large and handsome, growth stately, 5 ft.	0 6
727	," lusitan'i'cus cris'pus, very ornamental, 3 ft.	0 6
728	," mollis, white, the elegant Acanthus leaf of Architecture, 3 ft.	0 3
729	," spin'o'sus, white, beautiful and curious spiny foliage, 3 ft.	0 6
730	choice mixed from the above species.....	6d. & 1 0

ACHIME'NES, Nat. Ord. *Gesnera'ceæ*. Splendid warm greenhouse bulbs.

731	Achime'nes mixed, choicest varieties (Roots, 4/6 to 9/- per dozen, these are preferable to seed)	2 6
-----	--	-----

ACROCLIN'IUM, Nat. Ord. *Compos'itæ*. Charming hardy annuals.

732	Acroclin'i'um al'b'um, white, 1 ft. { Beautiful border plants with pretty everlasting flowers, 3d. & 0 6	
733	," ro'se'um, rose, 1 ft. } which are valuable for winter bouquets. 3d. & 0 6	

ACTINEL'LA, Nat. Ord. *Compos'itæ*. Hardy perennial.

734	A charming dwarf, compact-growing, free-flowering, silvery-grey foliaged plant, valuable for rockwork. 3d. & 0 6	
	Actinel'la scapo'sa, yellow, flowering throughout the summer, 3/4 ft.	0 6

		Per pkt. s. d.
	ADENOCARPUS , Nat. Ord. <i>Faba'ceæ</i> . Handsome hardy shrub.	
735	Adenocarpus telonen'sis, yellow, a beautiful species of <i>Cytisus</i> , 3 ft.	o 6
	ADO'NIS , Nat. Ord. <i>Ranuncula'ceæ</i> . Beautiful hardy annuals, etc.	
736	Ado'nis autumnalis flam'mea, dark red, 1 ft.	o 3
737	" cupana'na, blood-red, 1 ft.	o 3
738	" verna'lis, yellow, 1 ft., h. perennial	o 3
	Very effective plants for flower border decoration. <i>Vernalis</i> flowers in spring, <i>Cupaniana</i> in summer, and <i>Flammea</i> in autumn.	
	ETHIONE'MA , Nat. Ord. <i>Crucif'iceæ</i> . Hardy Alpine perennials.	
739	Ethione'ma cordifo'lia, delicate pink, $\frac{1}{2}$ ft.	o 6
740	" saxa'tile, rose-lilac, $\frac{1}{2}$ ft.	o 6
741	" grandif'ora, rose-crimson, $\frac{1}{2}$ ft.	o 6
742	" mixed, $\frac{1}{2}$ ft.	o 6
	Charming dwarf plants which enliven the rock-garden in June with their pretty fresh-coloured flowers.	
	AGAPANTHUS (African Lily), Nat. Ord. <i>Hemerocallida'ceæ</i> .	
743	Agapanthus umbella'tus, blue, a handsome plant for vases, etc., half-hardy perennial, 2 ft.	o 6
744	" max'imus, blue, half-hardy perennial, 3 ft.	i o
745	" Moorea'nus (new), blue, an elegant pot plant, half-hardy perennial, 1 ft.	i o
	AGERATUM , Nat. Ord. <i>Compos'iteæ</i> . Very showy half-hardy annuals.	
746	Ageratum Mexica'num, blue, 1 ft.	o 3
747	" al'bum, white, 1 ft.	o 3
748	" Tom Thumb, blue, $\frac{1}{2}$ ft.	o 3
749	" al'bum, white, $\frac{1}{2}$ ft.	o 3
750	" Imperial dwarf, azure blue, $\frac{1}{2}$ ft.	o 3
751	" " red-lilac, $\frac{1}{2}$ ft.	o 3
752	" " white, $\frac{1}{2}$ ft.	o 3
753	Lasseau'xii (new), rose, 1 ft.	o 3
	The Ageratums are splendid bedding plants, blooming continuously till destroyed by frost. To cut for furnishing vases the flowers are most valuable, the blue changing to a rich mauve by candle light. The Tom Thumb and Imperial dwarf varieties are most valuable additions to our bedding plants. Cultivated in pots all the varieties are useful under glass.	
	AGROSTEM'MA , Nat. Ord. <i>Caryophylla'ceæ</i> . All beautiful and showy.	
754	Agrostemma celi-ro'sa, bright rose, $\frac{1}{2}$ ft.	o 3
755	" al'ba, pure white, $\frac{1}{2}$ ft.	o 3
756	" na'na lilaci'na, lilac, 1 ft.	o 3
757	" corona'ria, rose purple, $\frac{1}{2}$ ft.	o 3
758	" al'ba, white, rose centre, $\frac{1}{2}$ ft.	o 3
759	" bi'color, rose, white centre, $\frac{1}{2}$ ft.	o 3
760	" atrosanguin'ea, purple-crimson, $\frac{1}{2}$ ft.	o 3
761	Flos-Jo'ves (Jove's Flower), bright pink, $\frac{1}{2}$ ft.	o 3
762	mixed perennial varieties, $\frac{1}{2}$ ft.	o 3
	These are very showy hardy perennials, and are the popularly known "Rose Campion." The cut flowers are valuable for bouquets.	
	ALONSO'A , Nat. Ord. <i>Scrophularia'ceæ</i> . Beautiful half-hardy annuals.	
	Charming plants for pot culture, and decorative in the flower garden.	
763	Alonso'a albiflo'ra, (new) white, rich glossy green foliage, 1 ft.	o 6
764	" linifolia, (new) bright scarlet, 1 ft.	o 6
765	" Muti'sii, (new) blush, scarlet-centre, 1 ft.	o 6
766	" Warscewic'zii, bright crimson-scarlet, 1 ft.	o 6
	ALSTRÖEME'RIA , Nat. Ord. <i>Amaryllida'ceæ</i> . Handsome hardy perennials.	
767	Alströeme'ria choicest mixed, including many fine species, $\frac{1}{2}$ ft.	o 6
	ALYS'SUM , Nat. Ord. <i>Crucif'iceæ</i> . Attractive hardy perennials, etc.	
	Most valuable plants for rock-work, edgings, and the decoration of the spring flower-garden.	
768	Alys'sum argen'teum, yellow, with gracefully divided silvery-grey foliage, 1 ft.	o 6
769	" saxat'ile, yellow, 1 ft.	o 6
770	" compact'um, yellow, $\frac{1}{2}$ ft.	o 6
771	" odora'tum (Sweet Alyssum), white, a charming summer bedding annual, $\frac{1}{2}$ ft.	3d. & o 6
	Important for the spring flower-garden; the golden hue contrasts effectively with white <i>Arabis</i> , etc.	
	AMARANTHUS , Nat. Ord. <i>Amaranta'ceæ</i> . Handsome half-hardy annuals.	
	Beautiful ornamental foliage plants, very striking in beds, masses, and for conservatory decoration.	
772	Amaranthus bi'color olbi'en'sis, leaves dark purple, terminal ones blood red, 2 ft.	o 6
773	" ru'ber, leaves bright carmine scarlet, base of leaves and branchlets green striped and shaded purple-red, and sometimes pointed yellow, 1 ft.	3d. & o 6
774	" eleganti'ssimus, leaves intense scarlet shaded bronzy purple, 2 ft.	o 6
775	Hen'deri, leaves brilliantly coloured and varied, 3 ft.	o 6
776	" Princess of Wales, (new) leaves intense carmine, tipped olive-green, or bright yellow, 3 ft.	o 6
777	melancholic'ru'ber, rich resplendent carmine foliage, beautiful, 1 ft.	3d. & o 6
778	" versicolor, foliage beautifully variegated, 1 ft.	o 6
779	salicifo'lius, graceful leaves, shading to a bright orange red, &c., 3 ft.	3d. & o 6
780	tri'color, leaves scarlet, yellow, and green, beautiful, $\frac{1}{2}$ ft.	3d. & o 6
781	" amabil'is, leaves variegated brilliant rose, scarlet and yellow, $\frac{1}{2}$ ft.	o 6
782	" gigant'eus, leaves purple, red, green, and yellow, 5 ft.	3d. & o 6
	AMARYLLIS , Nat. Ord. <i>Amaryllida'ceæ</i> . Magnificent greenhouse bulbs.	
783	Amaryllis, from choice hybrid varieties	1s. & 2 6
	AMBLYOLE'PIS , Nat. Ord. <i>Compos'iteæ</i> . Very fragrant hardy annual.	
784	Amblyolepis setig'era, bright yellow, fine showy border plant, 1 ft.	o 3
	AMBRO'SIA , Nat. Ord. <i>Compos'iteæ</i> . A very fragrant hardy annual.	
785	Ambrosia Mexica'na, valued for its sweet-scented foliage, 2 ft.	o 3
	AMMO'BIIUM , Nat. Ord. <i>Compos'iteæ</i> . A fine hardy annual.	
786	Ammo'bium ala'tum, white, a very remarkable looking plant, with everlasting flowers, 2 ft.	o 3
	AMPHICOME , Nat. Ord. <i>Bignonia'ceæ</i> . Elegant greenhouse perennials.	
787	Amphicome choice mixed, fine plants, with beautiful Pentstemon-like flowers, 1 ft.	o 6

ANAGAL'LIS, Nat. Ord. *Primula'ceæ*. Beautiful half-hardy annuals.

Lovely dwarf plants, effective on rock-work, as edgings for small beds, and as pot plants.

		Per pkt. s. d.
788	Anagal'lis grandifl'ra	Brewer's, rich intense blue flowers, $\frac{1}{2}$ ft.
789	"	frutic'osa (coccinea), rich vermillion, $\frac{1}{2}$ ft.
790	"	Imper'atrice Eug'ne, light blue, edged white, $\frac{1}{2}$ ft.
791	"	linifolia, fine blue flowers, very dwarf, $\frac{1}{2}$ ft.
792	"	Napoleon the Third, maroon, $\frac{1}{2}$ ft.
793	"	sanguine'a, bright ruby, beautiful, $\frac{1}{2}$ ft.
794	"	choice mixed from the above 6d. & 1

ANCHU'SA, Nat. Ord., *Boragina'ceæ*. Hardy perennials.These are remarkably effective border plants: *Italica* is charming in wild gardens and shrubberies.

		o 6
795	Anchu'sa capen'sis, intense blue	, the charming "Cape Forget-Me-Not," $\frac{1}{2}$ ft.
796	" incarna'ta, flesh colour	, 2 ft. o 3
797	" ital'ica, intense blue	, 4 ft. o 3

ANEMO'NE, Nat. Ord. *Ranuncula'ceæ*. Splendid hardy perennials.

		3d. & o 6
798	Anemo'ne corona'ria choice mixed	, $\frac{1}{2}$ ft. 3d. & o 6
799	" scarlet	, $\frac{1}{2}$ ft. 3d. & o 6
800	" semi-plena, mixed	, $\frac{1}{2}$ ft. } varieties of the Poppy Anemone. The varieties 6d. & o 6
801	" alba, white	, $\frac{1}{2}$ ft. } of Semi-plena are extremely handsome. o 6
802	" fulgens, light scarlet	, $\frac{1}{2}$ ft. 1 o
803	" japonica, red	, 2 ft. } Matchless autumn-flowering plants for lines, mixed 1 o
804	" H. Jobert, white	, 2 ft. } flower or shrubbery borders, and to cut for vases 1 o
805	" stellata, the beautiful starry Wind-flower	, $\frac{1}{2}$ ft. o 6
806	" 8 species in mixture, of Alpine Wind-flowers 6d. & 1 o

ANGELO'NIA, Nat. Ord. *Scrophularia'ceæ*. Handsome warm greenhouse perennial.

		1 o
807	Angelo'nia grandifl'ra, purple-blue	, centre spotted white, dwarf and compact, 1 ft. 1 o

ANOMATHE'OA, Nat. Ord. *Irida'ceæ*. Charming dwarf hardy bulb.

		o 6
808	Anomathe'oa. cruenta, orange, spotted with crimson, very pretty	, $\frac{1}{2}$ ft. 1 o

ANTIRRHINUM (Snapdragon), Nat. Ord. *Scrophularia'ceæ*. Hardy perennials.

Handsome free-flowering border plants, which are decorative the first season. The Tom Thumb varieties are dwarf, compact, very floriferous, and make superb bedding plants.

		6d. & 1 o
809	Antirrhinum majus mixed	, from the choicest named Scotch and English varieties, 2 ft. 6d. & 1 o
810	" saved	from very fine varieties, 2 ft. 3d. & 0 6
811	" Pestridge's splendid prize varieties	, 2 ft. 1 o
812	" al'bum, pure white	, 2 ft. 0 3
813	" brilliant, crimson, white throat	, 2 ft. 0 3
814	" caryophylloides, magnificently striped	, 2 ft. 0 3
815	" Cres'cia, deep scarlet, splendid	, 2 ft. 0 3
816	" Dell'a, rosy carmine and white	, 2 ft. 0 3
817	" Firefly, orange, scarlet, and white	, 2 ft. 0 3
818	" Galathe'e, crimson, yellow, and white	, 2 ft. 0 3
819	" nigres'cens, deep crimson, very beautiful	, 2 ft. 0 3
820	" papillona'ceum, bright scarlet and white	, 2 ft. 0 3
821	" na'num album, striatum, Brilliant, Firefly, Henry the IV., kermesina splendens, and papillona'ceum	, 1 $\frac{1}{2}$ ft., each variety 0 3
822	" na'num mixed	, from the above 7 choice varieties, 1 $\frac{1}{2}$ ft. 3d. & 0 6
823	" Tom Thumb crimson, carnation striped, yellow striped red, Dell'a, Henry the IV., yellow, Firefly, Brilliant, cupreatum and white	, 1 ft. each 0 6
824	" Tom Thumb mixed	, from the above 10 choice bedding varieties, 1 ft. 6d. & 1 o
825	" Asari'na, yellow, valuable for rock-work, hanging baskets, and pots, $\frac{1}{2}$ ft. 0 6
826	" assur'gens, flowers white tinted yellow, a fine rock-plant	, $\frac{1}{2}$ ft. 0 6
827	" rupestris, purple and yellow, a charming dwarf rock-plant	, $\frac{1}{2}$ ft. 0 6

APLOPAP'FUS, Nat. Ord. *Compositæ*. Showy half-hardy annuals.

		o 6
828	Aplopap'pus cilia'tus, yellow	, producing in profusion its beautiful flowers late into the autumn, 3 ft. 0 6
829	" rubigino'sus, golden yellow	, a very effective profuse autumn-flowering plant, 2 $\frac{1}{2}$ ft. 0 3
830	" spinulosus, bright yellow, branched, compact, and profuse flowering	, 1 $\frac{1}{2}$ ft. 0 6

AQUILE'GIA (Columbine), Nat. Ord. *Ranuncula'ceæ*. Handsome hardy perennials.

Very decorative for flower borders and rockwork in May and June, and most useful to cut for vases.

		3d. & 0 6
831	Aquile'gia choice mixed double varieties 3d. & 0 6
832	" single varieties 3d. & 0 6
833	" al'ba ple'na, fine double white	, 2 ft. 0 3
834	" alpi'na, blue and white	, 1 ft. 0 6
835	" califor'nia, bright scarlet, large and beautiful	, 2 ft. 0 6
836	" chrysanth'ha, bright yellow, large and beautiful	, 2 ft. 0 6
837	" caryophylloides, double, magnificently striped varieties	, 2 ft. 0 6
838	" corule'a, violet-blue and white, long spurs, fine species	, 1 $\frac{1}{2}$ ft. 0 6

	CAN'NA , Nat. Ord. <i>Martaca'ceæ</i> . Highly ornamental half-hardy perennials.	
	Scientific gardening has reached an epoch when sub-tropical or Leaf Gardens in any part of the three kingdoms are no longer a chimera. It is simply a question of the right place for the plants, the right plants for the place, and the treatment necessary to ensure success. In this style of gardening, the Canna must necessarily take the prominent position: possessing, as it does, large picturesque foliage, varied both in form and colour, with a chasteness yet boldness of outline peculiar to itself, and which renders it an equally pleasing associate either with shrubs or flowers. Although we have alluded to the foliage only of these plants, it must not be forgotten that their flowers are very decorative, rising conspicuously, as they do, from amidst the amplitude of leaves.	
	1 stock of Cannas is easily secured by sowing the seed early in spring in a strong moist heat, and the plants will be in flower the first season; or the seed may be sown later to form rhizomes for another year.	
	The following varieties are a selection of those most recently introduced, and we are glad of thus having the opportunity afforded of offering some important additions to the Cannas now cultivated in this country.	
1039	<i>Can'na</i> Admira'tion, a very handsome variety

1097	" Taur'icus, a majestic plant, 6 ft.	○ 3

CARNATION, Nat. Ord. *Caryophyllaceae*. Indispensable fragrant hardy perennials.

A reserve piece of ground should be devoted to the cultivation of Carnations for cut flowers: plants from seed are infinitely more floriferous than from cuttings; from first quality seed, 80 per cent. usually come double; and charming varieties can always be selected from amongst them. Carnations, by name, in 60 varieties, fine strong plants, ready to plant out, 6/-, 9/-, and 12/- per dozen.

1098	Carnation, saved from the choicest double flowers, 1½ ft.	
1099	" fine double flowers, 1½ ft.	2 6
1100	" pépérial, saved from the choicest double flowers, 1½ ft.	1 0
1101	" " fine double flowers, 1½ ft.	2 6
1102	" dwarf double early flowering, mixed, charming compact bushy varieties, 1 ft. ... 6d. &	1 0
1103	" saved from very good border double flowers, 1½ ft.	0 6

CAS'SIA, Nat. Ord. *Leguminosae*. Beautiful ornamental greenhouse shrubs.

1104	Cas'sia choice mixed, from many varieties Ed. & r 0	
------	--	--

CATANAN'CHE, Nat. Ord. *Compositae*. Very useful hardy perennials.

1105	Catanan'che cœrulea, blue, purple centre, 2 ft.	Fine free-flowering border plants, val-
1106	" bl'color, white, violet centre, 2 ft.	able to cut for winter bouquets. ○ 3

OATOHFLY, Nat. Ord. *Caryophyllaceae*. Showy hardy annual.

1107	Catchfly, Lobel's, red, a showy early flowering plant, effective in beds and borders, 1½ ft.	3d. & ○ 6
------	---	-----------

CEANO'THUS, Nat. Ord. *Rhamnaceae*. Beautiful half-hardy wall shrubs.

1108	Ceano'thus choice mixed, admirably adapted for fronts of villas and conservatories, 3 ft.	1 0
------	--	-----

CEDRONEL'LA, Nat. Ord. *Labiatae*. Elegant hardy perennial.

1109	Cedronella can'a, deep purple flowers in long spikes, and neat fragrant foliage, 1½ ft.	○ 6
------	--	-----

CELO'SIA, Nat. Ord. *Amarantaceae*. Graceful and beautiful conservatory annuals.

These are highly decorative autumn and winter-blooming plants. As specimens for the conservatory they can be grown 3 ft. high and 3 ft. in diameter, a mass of bloom from the pot to the apex of the plant; or, in small pots, nice plants can be grown for the drawing-room, sitting-room, or dinner-table. To cut for furnishing vases, the value of the flowers of *Celosia pyramidalis* cannot be over-estimated.

1110	Celosia argen'tea, silvery white, shaded rose, in elegant flower spikes, 3 ft.	
1111	" Hut'oni, leaves deep claret and bright crimson, terminal flower spikes crimson, a fine sub-tropical plant, and valuable for pot culture, 3 ft.	○ 6

1112	" pyramidal'lis al'ba, white, graceful silvery plumes, 2 ft.	I 0
1113	" atroviola'cea, brilliant rich purple plumes, 2 ft.	○ 6

1194	" atropurpurea, bright blue, with yellow centre, $\frac{1}{2}$ ft.	○ 6

COCKSCOMB (*Celosia cristata*), Nat. Ord. *Amaranta'ceæ*. Greenhouse annuals.

Remarkable and highly ornamental plants, for the conservatory and warm situations out of doors.

		Per Pkt.	s. d.
1195	Cockscomb Dwarf, crimson, saved from fine selected combs, 1 ft.	6d. &	1 0
1196	" choice mixed, continental saved seed, 1 ft.	6d. &	1 0
1197	" Tom Thumb crimson, producing large combs on plants 5 to 6 inches high	6d. &	1 0
1198	" Giant, large brilliant red flowers, continental saved seed, 1½ ft.	6d. &	1 0
1199	" choice mixed, continental saved seed, 1½ ft.	6d. &	1 0
1200	" variegata (new), crimson and yellow mottled flowers, 1½ ft.	6d. &	1 0

OOLEUS, Nat. Ord. *Lamiaceæ*. Ornamental leaf plants.

For the adornment of the greenhouse and sitting-room, the new hybrid Coleus are most decorative, and in the flower garden, either alone or associated with other plants, they are extremely ornamental, while to cut for table bouquets, few leaf-plants are so effective by gas light.

1201	Coleus, saved from all the newest and most beautiful hybridized varieties, 2 ft.	1s. &	2 6
------	--	-------	-----

COLLIN'SIA, Nat. Ord. *Serophularia'ceæ*. Beautiful hardy annuals.

1202	Collinsia bi'color, purple and white, 1 ft.	The Collinsias are all very effective annuals for flower garden decoration.	o 3
1203	" alba, pure white, 1 ft.	When sown in Aug. for a spring display, the flowers are much larger and more beautiful, and last longer than the spring-sown plants in summer. The effect of these fine annuals in May from the autumn-sown seed is exquisite, and as pot plants in March and April they are beautiful.	o 3
1204	" heterophylla, violet-purple and white, 1 ft.		o 3
1205	" multi'color marmorata, white and rose, 1 ft.		o 3
1206	" grandiflora, blue and white, 1 ft.		o 3
1207	" lilacina (new), lilac, 1 ft.		o 3
1208	" violacea, white and blue, 1 ft.		o 3
1209	" fine mixed, from the varieties, 1 ft. 3d. &		o 3
1210	" ver'na grandiflora, blue and white, should be sown immediately it is harvested, 1 ft.		o 6

COMMELINA, Nat. Ord. *Commelinac'eæ*. Half-hardy perennials.

1211	Commelin'a fine mixed, really effective border plants, 2 ft.	o 6
------	--	-----

CONVOL'VULUS, Nat. Ord. *Convolvulac'eæ*. Beautiful hardy trailing annuals, etc.

The first six species are perennials, and very desirable for rock-work and hanging baskets.

1212	Convolvulus althaeoides, rose-purple, dark eye, pretty dwarf twiner, hardy perennial.	o 4
1213	" aureus superbus, golden yellow, a pretty creeping species, half-hardy perennial.	o 6
1214	" cantabricus, rose-purple, very pretty twiner, hardy perennial.	o 4
1215	" floridus, pink, pretty creeper, half-hardy perennial.	o 6
1216	" mauritanicus, beautiful soft blue, fine creeper for hanging baskets, hardy perennial.	o 6
1217	" oleifolius var. pilosus, white, with silvery foliage, hardy perennial.	o 6
1218	" mixed, from the above varieties.	6d. & 1 0
1219	" cupania'nus, rich blue, spotted black, a fine, distinct, rock plant, hardy annual.	o 3
1220	" triflorus monstro'sus, deep violet-purple, 1 ft.	o 3
1221	" splendens, rich violet, 1 ft.	o 3
1222	" stria'tus, blue and white, 1 ft.	o 3
1223	" albus, silvery white, 1 ft.	o 3
1223½	" kermesina, crimson-violet, 1 ft.	o 6
1224	" subceruleus, dove colour, 1 ft.	o 3
1225	" robustus unicaulis, rich purplish-blue, 1 ft.	o 3
1226	" mixed, from the above, 1 ft. 3d. &	o 6
1227	" double varieties in mixture, 1 ft.	o 6

The varieties of *C. tricolor* are amongst the most showy of hardy annuals. In beds, flower borders, and on rock-work, their handsome flowers are seen to great advantage. *Robutus unicolor* is erect in growth, and produces flowers of great size. *C. cupanius* is a unique annual for rock-work.

CORDYLINE (*Dracaena*), Nat. Ord. *Liliac'eæ*. Ornamental-foliaged greenhouse plants.

1228	Cordyl'ne indivisa, australis, linia'ta, Veitchii, etc., in mixture.	1s. &	2 6
------	--	-------	-----

CORONIL'LA, Nat. Ord. *Leguminosæ*. Beautiful hardy perennials.

1229	Coronilla, fine mixed varieties.	o 6
------	----------------------------------	-----

COS'MOS, Nat. Ord. *Compositæ*. Very ornamental hardy annuals.

1230	Cos'mos bipinnata, purple and yellow, 2 ft. } The graceful effect of these fine foliage plants	... o 3
1231	" " purpureus, purple, 2 ft. } when grown singly, is very striking.	... o 3

1232	Cowslip new giant, mixed, 1 ft. } For beds in the spring flower garden, planting in woodland	o 6
1233	" fine mixed, 1 ft. } walks, etc., these cannot be too extensively used	o 3
1234	" scarlet duplex, very beautiful, 1 ft. } 6d. & 1 0	o 6

ORESS (*Barbarea vulgaris*), Nat. Ord. *Cruciferæ*. Hardy perennial.

1235	Cress variegated; for the winter and spring flower garden this is a charming plant, the rich green, polished surface of the leaves is profusely blotched with golden variegation, ½ ft.	o 6
------	--	-----

CRUCIANEL'LA, Nat. Ord. *Galidac'eæ*. Hardy perennial for rock-work.

1236	Crucianella stylo'sa, pink, a very pretty rock plant, continues long in bloom, 1 ft.	o 3
------	---	-----

OU'PHEA, Nat. Ord. *Lythrac'eæ*. Beautiful half-hardy and greenhouse plants.

For the decoration of the conservatory, flower beds, and borders, these are favourites.

1237	Cuphea em'mens, bright red and yellow, in long superb branches, splendid, 2 ft.	o 6
1238	" Galeottia'na, velvety black, a beautiful species, of fine habit, h.-h. perennial, 1½ ft.	o 6
1239	" ocyom'ides, rich purple-violet, bushy, half-hardy annual, 2 ft.	o 6
1240	" platycer'ea, scarlet, white, and purple, beautiful, 1 ft.	o 6
1241	" purpu'rea, rosy scarlet, purple calyx, very elegant h.-h. annual, 1 ft.	o 3
1242	" Zimp'an'i, red violet, large flowers, very ornamental species, h.-h. annual, 1½ ft.	o 6
1243	" choice mixed annual varieties	o 6
1244	" " perennial varieties	o 6

OY'OLAMEN, Nat. Ord. *Primulac'eæ*. Greenhouse and hardy bulbs.

Charming plants, which are best propagated from seed, and they flower profusely the second season.

1245	Cyclamen Per'sicum grandiflorum, to which so many prizes and certificates have been awarded by the Floral Committee of the Royal Horticultural Society; foliage, the most beautifully variegated; the flowers are crimson, magenta, scarlet, white, lilac, rose, and spotted, and many of them fragrant, ½ ft.	2 6
------	---	-----

1216	Cyclamen Persicum saved from fine varieties.....		
1247	" hardy varieties in mixture, including autumn, winter, and spring-flowering kinds.		
	These beautiful hardy autumn flowering Cyclamen are charming plants on rock-work, in select flower borders, and on dry banks, also valuable for pot culture; the foliage is exquisitely variegated during winter and spring, while the flowers in some of the varieties are almost as fine as those of Persicum, and many of them are delightfully fragrant. As winter bedding plants these are matchless, especially if associated with Snowdrops and Scilla Sibirica. For plants see page 74.	1s. &	2 6

CYTISUS, Nat. Ord. Leguminosæ. Highly decorative greenhouse and hardy shrubs.

1248	Cytisus, choice mixed varieties; ornamental on lawns and in flower borders.....		0 6
------	---	--	-----

DAHLIA, Nat. Ord. Compositæ. Handsome half-hardy perennials.

1249	Dahlia large-flowered, double, 4 ft.	Sown in spring these bloom profusely in autumn, yielding a	1 0
1250	" small-flowered, double, 4 ft.	large proportion of fine double flowers.	1 0

1277	" nudicaule, orange-scarlet, fine dwarf compact habit, 1½ ft.		1 0
1278	" Sinen'se, choice mixed French hybrids, 2 ft.		0 3
1279	" New double named varieties, in mixture		1 0
1280	" fine mixed varieties	3d. &	0 6

For annual varieties of Delphinium, see Larkspur, p. 30.

DIANTHUS, Nat. Ord. Caryophyllaceæ. Splendid hardy annuals, etc.

D. sinensis (Chinese or Indian Pink, as it is sometimes called) ranks foremost in bedding plants from seed. Raised early in spring under glass, potted on and planted out, it is in bloom in June, and will continue covered with flowers till late in autumn, if a little attention is paid to it. Some of the finest effects in our Experimental Grounds have been produced by the varieties of Imperialis, Heddwigii, Lacinatus, and Nanus. If seed is sown in autumn the plants stand the winter, and in summer each plant will form a complete bush. The flowers range in colour from the purest white to the deepest crimson and the most beautiful lilac. Seed may also be sown from March to May out of doors where intended to bloom for a summer and late autumn display.

1281	Dianthus sinensis imperialis, choice mixed double, 1 ft.	3d. &	0 6
1282	" " albus fl. pl., double white, 1 ft.		0 6

	IRIS , Nat. Ord. <i>Irida'cea</i> . Hardy bulbs.	
The English and Spanish Iris embrace so much that is rare and beautiful in the combinations of their colours, that the only plants to compare them with are the rare and beautiful tropical orchids, the <i>Lælias</i> , <i>Cattleyas</i> , and <i>Oncidiums</i> . The Bearded Flag Iris for mixed borders and surrounding artificial lakes and ponds, is unrivalled; a single plant will produce a hundred spikes of bloom, and may be had in an infinite variety of colour, from the richest yellow, the intensest purple, the most delicate blue, the softest mauve, the most beautiful claret-red, to whites and primroses; of bronzes the shades are innumerable, and the combinations indescribable. These are best had in plants. See descriptive list, p. 71.

1569 " " Stock-flowered tall mixed, 2½ ft.	branching mixed, 2½ ft.	The tall Larkspurs are exceedingly effective in mixed flower borders and amongst shrubs; they are also of great value to cut for vases, etc., being constantly in bloom, especially the autumn sowings. 3
1570 " " branching mixed, 2½ ft.	blue, 2½ ft. 3
1571 " " white, 2½ ft.	white, 2½ ft. 3
1572 " " tricolor elegans, 2½ ft.	tricolor elegans, 2½ ft. 3
1573 " " tricolor elegans, 2½ ft. 3

LASTHE'NIA, Nat. Ord. Compos'itæ. A spring flowering hardy annual.

1574 Lasthe'nia Califor'niæ, sown in autumn, in spring it is a sheet of golden yellow, ¾ ft. 3d. & 1 o

LATHY'RUS (Everlasting Pea), Nat. Ord. Legumino'sæ. Useful hardy perennials, etc.

1575 Lath'yru's latifoliu's al'bus, white, 5 ft.	These make decorative groups in the borders, and are valuable to cut for bouquets, also as a floral screen, and protection to more tender plants. 3
1576 " grandiforu's, crimson, 5 ft. 6 6
1577 " splen'dens, rose, large, 5 ft. 3 3
1578 " rotundifoliu's, rose-purple, very showy, 2 ft. 3 3
1579 " choice mixed. 6 6
1580 " azu'reus, bright blue, a charming little annual, ½ ft. 3 3

LAVATERA, Nat. Ord. Malva'ceæ. Showy hardy annuals, etc.

1581 Lavate'ra trimes'tris, rose, pink striped, 3 ft.	Exceedingly valuable annuals for distant effect in masses, and for large borders. 3
1582 " al'ba, white, 3 ft. 3 3
1583 " arbo'rea, rose-purple, a stately plant for shrubby borders, hardy perennial, 5 ft. 3 3
1584 " Thuringia'ca, pale purple, handsome border hardy perennial, 5 ft. 3 3

LEPTOSIPHON, Nat. Ord. Polemonia'ceæ. Charming hardy annuals.

1585 Leptosi'phon densifo'rūs, rose-lilac, 1 ft.	These are gems of chaste beauty in flower and foliage. Sow spring and autumn.	3d. & 1 o
1586 " al'bus, pure white, 1 ft. 6 6
1587 " hy'bridus, various, ½ ft.	For small beds, edgings, rockwork, and for massing, these beautiful dwarf plants are exquisite.	3d. & 1 o
1588 " kermes'nus, ½ ft.	Roseus 6
1589 " au'reus, yellow, ½ ft.	is a gem of recent introduction. If sown in autumn, they flower in spring and are a dense mass of blossom. 6
1590 " ro'seus, rich rose, ½ ft. 6 6

LEPTOSY'NE, Nat. Ord. Compos'itæ. Half-hardy annual.

1591 Leptosy'ne maritim'a, golden yellow, flowers in large heads elevated on long foot stalks, the foliage elegantly cut, and of a lively green, a plant of fine aspect, 3 ft. 0 6

LIA'TRIS, Nat. Ord. Compos'itæ. Handsome hardy perennials.

1592 Lia'tris el'egeans, purple, 2 ft.	These are charming herbaceous perennials, remarkable for their handsome feathery tufted flower spikes, and the singular habit of the flowers, developing from the top of the spike downward. 6
1593 " puncta'ta, spotted, 2 ft. 6 6
1594 " pycnostach'ya, rose-purple, 2 ft. 6 6
1596 " spica'ta, purple, 1½ ft. 6 6

LIL'IUM, Nat. Ord. Lilia'ceæ. Magnificent hardy bulbs.

Seedlings seldom appear above ground till the second season; care should on this account be taken to sow either in pans or pits where they will not be disturbed. The raising of these bulbs from seed is a very slow process; bulbs should therefore be purchased in preference. For a fine collection, correctly named in accordance with the Monograph of J. G. Baker, Esq., and embracing the most recent introductions, see page 68.

1596 Lilium mixed, including Auratum, Speciosum, Giganteum, Humboldti, Callosum, Albanicum, &c, 1s. & 2 6
1597 " marta'gon Dalmaticum, rich purple, the most beautiful of the Martagon section 1 o

LILY OF THE VALLEY (Convallaria majalis), Nat. Ord. Lilia'ceæ. Hardy perennial.

Those who are desirous of cultivating the Lily of the Valley in pots should purchase clumps, specially prepared for the purpose, 1/6 and 2/6 each, or flowering crowns at 10/6 per 100, 1/6 per dozen. Crowns for planting in woods, or forming groups in flower and shrubby borders, 3/6 and 5/6 per 100, 25/- and 40/- per 1000.

1598 Lily of the Valley, Seed for export 6d. & 1 o

LIMNANTHES, Nat. Ord. Tropæola'ceæ. Pretty hardy annuals.

Very effective plants for spring and summer gardens, may be sown in shady or damp situations.

1599 Limnan'thes Douglasii al'ba, white, ½ ft. 3d. & 1 o
1600 " grandiflor'a, bright yellow, bordered white, ½ ft. 3d. & 1 o

LINARIA, Nat. Ord. Scrophularia'ceæ. Useful hardy annuals, etc.

Very pretty small Snapdragon-like flowers, remarkable for the beauty and variety of their colours.

1601 Linaria alpi'na, blue and orange, hardy perennial, ½ ft.	For rock-work, stumps of trees, and vases, these three are charming. Tritis and Alpina make neat compact bedding plants. 6
1602 " Cymbalaria, purple, hardy perennial trailer, ½ ft. 6 6
1603 " tristis, yellow, blotched crimson, hardy annual, ¾ ft. 3 3
1604 " bipartita al'ba, pure white, 1 ft.	Very pretty, free-flowering annuals, suitable for beds, mixed borders, and to cut for bouquets. If sown in August, they are very effective in the spring garden. 3
1605 " strata'ta, white, striped purple, 1 ft. 3 3
1606 " splen'dida, rich deep purple, 1 ft. 3 3
1607 " New yellow, yellow, 1 ft. 6 6
1608 " fine mixed, 1 ft. 6 6
1609 " triornithoph'ora, reddish violet, 2 ft.	Fine border plants, the flowers resembling three birds perched on a spur. 3
1610 " car'nea, 2 ft. 3 3

LYNUM, Nat. Ord. Lind'ceæ. All beautiful perennials or annuals.

Distinguished garden favourites; grandiflorum coccineum is a perfect gem for beds, ribbons, and borders.

1611 Lynum arbo'reum, yellow, half-hardy perennial, 2 ft. 6
1612 " campanula'tum, yellow, flowers large, half-hardy perennial, 1½ ft. 6
1613 " corymbiflo'rūm lu'teum, straw colour, half-hardy annual, 1½ ft. 3

1622	Lisian'thus Russellia'nus, rich blue, shaded purple, a charming plant, $1\frac{1}{2}$ ft.	1 0
------	---	-----

LOBELIA, Nat. Ord. Lobelia'ceæ. Beautiful half-hardy annuals, etc.

Gems of the flower garden; the *Erinus* varieties are indispensable for beds and ribbons; *Gracilis* and *Pumila* are attractive for their compact tufts; and *Ramosa* is distinguished for its large flowers and branching habit. No plant in the flower garden is more useful than the blue *Lobelia speciosa*, or required for so great a variety of purposes. As an edging it is unsurpassed; in front lines and ribbons no plant is more effective; intermingled in small beds with the Variegated *Alyssum*, *Cerastium*, or *White Centaurea*, the effect is very beautiful; but when associated with the *Silver-leaved Grass*, *Dactylis elegansissima*, the combination is chasteness perfected. Seeing the importance therefore attached to this plant, it is very desirable to have seed from a pure and a good stock. Our *Lobelia speciosa superba* is by far the finest typical form, the colours rich and bright. *Blue King* is a fine acquisition.

1623	Lobel'ia Fabri varieties, mixed, 2 ft.	These are beautiful herbaceous border plants; their bold aspect and rich colours make them
1624	" ful'gen'is multifo'ra, scarlet, 2 ft. 1 0
1625	" Queen Victoria, scarlet, 2 ft. 1 0
1626	" syphilit'ica hybrida, various, 2 ft. 1 0
1627	fine varieties in mixture, 2 ft. 1 0
1628	Eri'nus compac'ta alba, pure white, in tufts, $\frac{1}{2}$ ft.	is. & 2 6
1629	" Blue Beauty, the finest blue, $\frac{1}{2}$ ft. 0 6
1630	" Blue King, light blue, centre pure white, $\frac{1}{2}$ ft. 1 0
1631	" Blue Stone, intense deep blue, fine bedder, $\frac{1}{2}$ ft.	6d. & 1 0
1632	" Emperor William, rich blue, very fine, $\frac{1}{2}$ ft.	is. & 2 6
1633	" Gord'o'ni, intense blue, white centre, $\frac{1}{2}$ ft. 0 6
1634	" Paxtonia'na, bright blue, centre pure white, $\frac{1}{2}$ ft. 0 6
1635	" Porcelain Brilliant, large light porcelain-blue, fine habit, $\frac{1}{2}$ ft.	The Erinus section of Lobelia is universally cultivated, and by far the most useful for bedding. It is easily managed, and may be had in the greatest abundance from seed; the varieties come quite true. The seed may be sown late in autumn or in spring, and the plants pricked off a few weeks before they should be put out, as they soon, after being potted off singly and plunged in a gentle bottom-heat, make nice plants. <i>Speciosa superba</i> is by far the finest in habit and colour. The new white <i>Speciosa</i> is an important acquisition; the colour is pure white, the habit free flowering, and continuous blooming, the same as in the blue variety, so that the plant forms a nice contrast. The different sorts of <i>Gracilis</i> compacta and <i>Pumila</i> make exceedingly pretty tufted edgings, and also look well in pots.
1636	" Prince Albert, bright azure blue, white centre, $\frac{1}{2}$ ft. 2 6
1637	" " The Bride," pure white, fine habit, $\frac{1}{2}$ ft. 0 6

MESEMBRYAN'THEMUM, Nat. Ord. <i>Mesembrya'ceæ</i> .	Charming half-hardy annuals, etc.
1733 Mesembryan'themum, Cape perennial species, in mixture, for greenhouse decoration	1 o
1734 " capitatum, pale yellow, $\frac{1}{2}$ ft.	Beautiful plants for rock-work, dry banks, and sunny situations. Cor. 3
1735 " cordifolium, pink, $\frac{3}{4}$ ft.	3
1736 " variegatum, leaves green & white, $\frac{3}{4}$ ft.	3
1737 " pomeridium, brilliant yellow, $\frac{3}{4}$ ft.	disfolium variegatum is a gem for flower beds and hanging baskets. 3
1738 " tri'color, rose, purple centre, $\frac{1}{2}$ ft.	3
1739 " al'bum, white, purple centre, $\frac{3}{4}$ ft.	Beautiful dwarf plants on 3d. & 6 south borders, rock-work, &c. 3d. & 6
MICHAUXIA, Nat. Ord. <i>Campanula'ceæ</i> .	Handsome hardy biennial.
1740 Michauxia campanuloides, large white Passion-flower-like blossoms in profusion, 3 ft.	6
MIGNONETTE (Reseda odorata), Nat. Ord. <i>Reseda'ceæ</i> .	Hardy annuals.
Seed of this universal favourite should be scattered liberally in flower and shrubby borders, also on dry banks, old walls, and any sunny situation, such for instance as the margins of gravel paths close under the windows. The varieties enumerated are all delightfully fragrant, but differ in shade of colour or habit of growth. The finest for pot-culture are the new varieties, <i>Pyramidalis gigantea</i> , <i>bouquet</i> , and <i>multiflora compacta</i> .	
1741 Mignonette, very fragrant, $\frac{1}{2}$ ft.	9d. per oz., 3d. & 6
1742 " grandiflora, (Crimson Giant) flowers large, and very fragrant, 1 ft.	1s. 3d. & 6
1743 " pyramidalis Bouquet, large-flowered, and the best for branched pyramids	6d. & 1 o
1744 " gigantea, the tallest, large-flowered, and the best for pyramids	6d. & 1 o
1745 " multiflora compacta, large-flowered and the most compact	6d. & 1 o
1746 Parson's New Tree, 1 ft.	6d. & 1 o
1747 " White Tree, very select, 1 ft.	6
1748 " Victoria crimson, a very fine variety, 1 ft.	1 o
1749 " Spiral New. See Novelty Sheet	2 o
MIMO'SA (Sensitive Plant), Nat. Ord. <i>Leguminosæ</i> .	Curious greenhouse annual.
1750 Mimo'sa pudica, so sensitive is this plant, that the leaves when touched, instantly fold up; it grows freely in the conservatory or sitting-room, and out doors from June, 2 ft.	6
MIM'ULUS (Monkey-flower), Nat. Ord. <i>Serophularia'ceæ</i> .	Beautiful perennials.
Splendid conservatory and sitting-room plants, with singularly shaped and brilliantly coloured flowers, distinguished by their rich hieroglyph-like markings. When cultivated indoors they succeed best if the pot is placed in saucers of water. Raised in heat, seedlings flower in a few weeks; in the open ground they are hardy, and flower freely; they also succeed admirably in shady, damp, and marshy situations, or by the sides of lakes.	
1751 Mim'ulus macul'osus, the beautifully tiger-spotted varieties, 1 ft.	6
1752 " du'plex, the calyx is beautiful y tiger-spotted like the corolla, 1 ft.	6d. & 1 o
1753 " a tropurpu'reus, calyx and corolla purple spotted, 1 ft.	1 o
1754 " Henderson's new beautifully spotted varieties, 1 ft.	6d. & 2 o
1755 " Clapham's superb strain of spotted Mimulus, 1 ft.	6
1756 " eu'preus, orange crimson, fine bedder, 1 ft.	6
1757 " Brilliant, scarlet, effective in beds, 1 ft.	6
1758 " du'plex, calyx and corolla orange crimson, fine bedder, 1 ft.	6
1759 " quinquev'laris ma'ximus du'plex, calyx and corolla heavily blotched, 1 ft.	6d. & 1 o
1760 " Roezlii, bright yellow, spotted crimson, a valuable new bedding species, 1 ft.	1 o
1761 " Tillin'gl, rich golden yellow, a fine bedding plant, not soon affected by drought, 1 ft.	1 o
1762 " choice mixed, including the foregoing varieties, 1 ft.	2 o
1763 " fine mixed, including the older varieties, 1 ft.	6
MUSK-PLANT, Nat. Ord. <i>Serophularia'ceæ</i> .	A favourite hardy perennial.
1764 Musk-Plant, yellow, musk scented, valuable for window boxes, etc., $\frac{1}{2}$ ft.	6d. & 1 o
MYOSO'TIS (Forget-me-not), Nat. Ord. <i>Boraginaceæ</i> .	Hardy perennials.
For filling beds or for conservatory decoration, we can supply plants of the Cliveden varieties of Forget-me-not and of <i>Dissitiflora</i> in quantity, prices on application. The name <i>M. alpestris</i> we have omitted, as this charming little Forget-me-not can only be had in plants; the seed which is commonly sold under this name is quite different. For spring gardening <i>M. sylvatica</i> and <i>M. dissitiflora</i> are by far the best; <i>Sylvatica</i> we recommend where great quantities are planted; <i>Dissitiflora</i> for select beds, and sheltered situations, and where a very early effect is required. All the Forget-me-nots are valuable for winter and spring flowering under glass.	
1765 Myoso'tis Azo'trica, blue, shaded purple, 1 ft.	Charming erect-growing Forget-me-nots, val-
1766 " al'ba, pure white, 1 ft.	able for pot culture, and very effective in the flower borders during June and July. 6
1767 " coelesti'na, turquoise-blue, 1 ft.	6
1768 " sylvat'ica, blue, $\frac{1}{2}$ ft.	6
1769 " white, $\frac{1}{2}$ ft.	These are the true Cliveden Forget-me-nots, which have attained so much celebrity through the extensive
1770 " rose, $\frac{1}{2}$ ft.	use made of them by Mr. Fleming, at Cliveden. 6
1771 " compacta, blue, $\frac{1}{2}$ ft.	1 o
1772 " dissitiflora, clear blue, the earliest of the Forget-me-nots; flowering in February, when the season is favourable, and continuing throughout the spring, $\frac{1}{2}$ ft.	6
1773 " oblonga'ta, bright blue, a robust growing continental variety, $\frac{3}{4}$ ft.	2 o
1774 " palustris semperflo'rens, blue, beautiful, flowers throughout the summer months in moist situations, $\frac{1}{2}$ ft.	6
MYRT'US (Myrtle), Nat. Ord. <i>Myrtaceæ</i> .	Half-hardy shrubs.
1775 Myrt'us commu'nis mixed, fine plants for the sitting-room, conservatory, and terrace	6d. & 1 o
NÆGE'LIA, Nat. Ord. <i>Gesnera'ceæ</i> .	Beautiful stove perennial bulbs.
1776 Næge'lia, saved from the choicest varieties	2 o
NASTUR'TIUM (Tropæolum), Nat. Ord. <i>Tropæold'ceæ</i> .	Beautiful hardy annuals.
Unrivalled for beauty, effect, and utility. In dry soils, or soils made poor with lime-rubbish, they will surpass the Geranium and Calceolaria in brilliancy and in profusion of bloom. To amateurs who have no glass they are a boon, and a valuable supplementary plant in cases of deficiency or failure of "bedding stuff."	
1777 Nasturtium scarlet King of Tom Thumb, intense scarlet, 1 ft.	These are the latest improvements, and unquestionably the finest and most distinct of the varieties of Tom Thumb, valuable for beds, ribbons, or marginal lines, each 1s. 6d. per oz. 6
1778 " golden King of Tom Thumb, golden yellow, 1 ft.	6
1779 " ruby King of Tom Thumb, ruby rose, 1 ft.	6
1780 " spotted King of Tom Thumb, 1 ft.	6
1781 " Tom Thumb, "King Theodore," deep-crimson, 1 ft.	6
1782 " " ceruleum ro'seum, beautiful peach, 1 ft.	6

1783	Nasturtium Tom Thumb, rich scarlet, effective as the Scarlet Geranium, 1 ft.	... 1/0 per oz., 3d. &	0	6
1784	" golden, more effective than Yellow Calceolaria, 1 ft.	... 1/0 , 3d. &	0	6
1785	" yellow, spotted crimson, 1 ft.	... 1/0 per oz.	0	3
1786	" crimson, rich colour, 1 ft.	... 1s. "	0	3

1795	" mixed, 1/2 ft. } fusely till late in autumn.	{ 1s. &	2	6

NEMESIA, Nat. Ord. Scrophulariacæ. Pretty compact growing half-hardy annuals.

1796	Nemesia compacta, mixed, 1/2 ft. } These are neat bushy profuse-flowering plants,	{ 3d. &	0	6
1797	" alba, pure white, 1/2 ft. } very desirable for beds, rock-work, and pots.	{ 0	3	
1798	" cerulea, sky blue, 1/2 ft. } They commence flowering when a few inches	{ 0	3	
1799	" bicolor, blue & white 1/2 ft. } high, and continue in beauty for months.	{ 0	3	

NEMOPHILA, Nat. Ord. Hydrolphyllaceæ. Charming hardy annuals, etc.

All exceedingly beautiful. Their height being nearly uniform, and their colours presenting strong contrasts, they are admirably adapted for sowing in circles or ribbons, especially in autumn for spring flowering.

1800	Nemophila atomaria coelestis oculata, celestial blue, blotched with black, 1/2 ft.	3d. &	0	6
1801	" elegans, pure white, with dark chocolate centre, very fine, 1/2 ft.	3d. &	0	6
1802	" foliis variegatis, a silvery variegated foliage variety of atomaria, 1/2 ft.	3d. &	0	6
1803	" discoidalis auriculata, rich crimson-brown, with white eye, 1/2 ft.	3d. &	0	6
1804	" argentea, silvery white, spotted chocolate, charming variety, 1/2 ft.	3d. &	0	6
1805	" nigra, jet black when the flowers first open, very distinct, 1/2 ft.	3d. &	0	6
1806	" punctata, white, spotted black, very pretty, 1/2 ft.	3d. &	0	6
1807	" vittata, velvety black, margined pure white, 1/2 ft.	3d. &	0	6
1808	" fine mixed varieties of discoidalis, 1/2 ft.	3d. &	0	6
1809	" insignis grandiflora, clear bright blue, white centre, 1/2 ft.	3d. &	0	6
1810	" alba, pure white, 1/2 ft.	3d. &	0	6
1811	" cramboides, celestial blue, 1/2 ft.	3d. &	0	6
1812	" lilacina, beautiful lilac, new and distinct, 1/2 ft.	3d. &	0	6
1813	" purpurea rubra, purple-pink, a new colour in this family, fine, 1/2 ft.	3d. &	0	6
1814	" striata, blue and white, 1/2 ft.	3d. &	0	6
1815	" fine mixed varieties of insignis, 1/2 ft.	3d. &	0	6
1816	" maculata grandiflora, white, veined & blotched violet, large & handsome, 1/2 ft.	3d. &	0	6
1817	" foliis-variegatis, white and violet, foliage variegated white, 1/2 ft.	3d. &	0	6
1818	" purpurea, purple, blotched violet, with white centre, very distinct, 1/2 ft.	3d. &	0	6
1819	" fine mixed varieties of maculata, 1/2 ft.	3d. &	0	6
1820	mixed, from all the above classes of Nemophila.	3d. &	0	6
1821	" phaeocarpoides, lilac, white centre, hardy perennial, 1/2 ft.	3d. &	0	6

NEPETA, Nat. Ord. Labiateæ. Fine hardy perennials.

1822	Nepeta Meyeri, clear azure blue, fine dwarf variety, 1 ft.	0	3
1823	" alba, white, 1 ft.	0	3

NICOTIA'NA (Tobacco Plant), Nat. Ord. Solanaceæ. Ornamental foliage plants.

Those enumerated are distinguished for their large foliage, rapid growth, and fine sub-tropical effect. Macrophylla gigantea and Wigandioides will be found illustrated by Mr. Robinson in his " Parks, etc., of Paris."

1824	Nicotiana glauca, a gigantic plant, with elegant and curious foliage, 6 ft.	0	6
1825	" macrophylla gigantea tea purpurea, large, majestic, picturesque foliage, 5 ft.	0	6
1826	" Sello-wii, handsome foliage, 3 ft.	0	6
1827	" solanifolia, 3 ft.	0	6
1828	" Texana, handsome foliage, 3 ft.	0	6
1829	" Wigandioides, large and extremely handsome, Wigandia-like foliage, 5 ft.	0	6
1830	" fine mixed varieties	3d. &	0	6

NIEREMBER'GIA, Nat. Ord. Solanaceæ. Half-hardy perennials.

1831	Nierembergia frutescens, white, veined lilac, 1 ft.	0	6
1832	" gracilis, white, veined lilac, 1 ft.	0	6
1833	" picata, a beautiful large-flowered var. (ncw) 1/2 ft.	from seed; Nierembergia is a hardy perennial, and valuable for pots out of doors; the growth erect and branching. Gracilis varieties are spreading and droop over baskets, vases, and rock-work, and are prized as edgings.	0	6
1834	" grandiflora alba, white, 1 ft.	1s. 6d. per oz.	1	0

NIGEL'LA (Love-in-a-Mist), Nat. Ord. Ranunculaceæ. Effective hardy annuals.

1835	Nigella Hispanica alba, pure white, 1 1/2 ft.	0	3
1836	" atro-purpurea, purple, 1 1/2 ft.	foliage and curiously formed flowers,	0	3
1837	" Damascena, pure white, 1 ft.	which have procured for them the fancy name of Love-in-a-Mist.	0	3
1838	mixed varieties,	3d. &	0	6

NOLA'NA, Nat. Ord. Nolaceæ. Pretty hardy annuals.

1839	Nolana atriplicifolia, blue-violet and white	These are of a trailing habit, and admirably adapted for rock-work, hanging baskets,	0	3
1840	" alba, pure white	0	3
1841	" subcerulea, mauve	wases, flower borders, etc.; the flowers resemble Convolvulus tricolor.	0	3
1842	fine mixed.	3d. &	0	6

NYCTERINTA, Nat. Ord. Scrophulariacæ. Pretty miniature half-hardy annuals.

1843	Nycterina capensis, brown, 1 ft.	Capsinia is prized for its rich fragrance; Selaginoides for its clusters of star-shaped flowers and compact growth,	0	6
1844	" selaginoides, pink, yellow centre, 1 ft.	for edgings, rock-work, small beds, and pot-culture.	0	3
1845	" alba, white, 1 ft.	0	3	

GENOE'THERA (Evening Primrose), Nat. Ord. Onagraceæ. Perennials and annuals.

1846	O. bistorta Veitchii, a gem for small beds and rock-work; Rosea Mexicana, a pretty dwarf plant; Drummondii, a fine, bold bedding plant; the others are valuable for borders, and prized either for their majestic growth, or large handsome flowers. In shrubberies and semi-wild places the tall varieties should be largely cultivated.	0	6

1883	" " " striped, 6 ft.	3d. & 0 6
1884	" " " white, 6 ft.	3d. & 0 6
1885	" " " mixed, 6 ft.	3d. & 0 6
	For making floral screens, to shut out unsightly objects, or to form hedgerows in exposed situations for protecting more tender plants, Sweet Peas are invaluable. In shrubbery and mixed flower borders pyramids of these supported by twiggy faggots are very effective. Grown in pots they can be had very early in bloom to cut for bouquets. Sow in November and December, and again in spring.	
	PELARGOTIUM (<i>Geranium</i>), Nat. Ord. <i>Geranial'ceæ</i> . Greenhouse plants.	
	For the decoration of the greenhouse, no plant is more popular than this, and when well grown its effect is matchless. At our summer flower shows it is a conspicuous object; the large bold flowers of the English, the beautiful spotting of the French, and the elegant and delicate colours of the Fancy, make them deservedly popular plants. The seeds we offer have been saved from first-class show varieties, and will yield flowers of the most advanced types. The raising of seedlings is very simple.	
1886	<i>Pelargo'nium</i> fancy, saved from the choicest varieties, 2 ft.	1s. & 2 6
1887	" English and French large-flowered, saved from the choicest varieties, 2 ft.	1s. & 2 6
1888	" Odier's spotted varieties, 2 ft.	1s. & 2 6
1889	" mixed, from the above varieties, 2 ft.	1s. & 2 6
	For <i>Zonal</i> , <i>Nosegay</i> and <i>Tricolor</i> <i>Feiargoniums</i> , See <i>Geranium</i> , page 26.	
	PENTAPE'TES , Nat. Ord. <i>Byttn'erin'ceæ</i> . Beautiful greenhouse perennials.	
1890	<i>Pentape'tes phœn'i'cea</i> , bright scarlet, a very fine pot plant, ¾ ft.	0 6
1891	" " " al'ba, white, a fine pot plant, ¾ ft.	0 6
	PENTSTE'MON , Nat. Ord. <i>Serophularia'ceæ</i> . Splendid hardy perennials.	
	For brilliant effect and continuous blooming in the flower garden, it is hardly possible to over-estimate the English hybrid Pentstemons. The flowers are large, the markings beautiful, and the colours rich and varied, while the habit of the plant is good and its culture simple. Of late years bedding plants have somewhat pushed the Pentstemon into the background, but the splendid hybrids exhibited at the meetings of the Royal Horticultural Society, and the fine collection grown at Chiswick have tended considerably to reinstate the Pentstemon as a popular garden favourite. To cut for vases and table bouquets few plants are more suitable.	
1892	<i>Pentste'mon</i> splendid mixed, saved from the finest large-flowered English hybrids	1s. & 2 6
1893	" choice mixed, including the newest species of English and Foreign varieties	1 0
1894	" fine mixed varieties	0 6

PERILLA, Nat. Ord. Labia'tæ. Valuable ornamental foliaged half-hardy annuals.

These are useful plants for back lines and ribbons, or as single specimens in mixed borders; the new variety, *atropurpurea foliis laciniatis* is a really fine acquisition.

1909	Perilla Nankinensis, deep mulberry foliage, a most useful plant in ribbons, 1½ ft.	3d. &	o 6
1910	" " <i>atropurpurea foliis laciniatis</i> , foliage elegantly serrated, 1½ ft.	3d. &	o 6

PETUNIA, Nat. Ord. Solanaceæ. Splendid half-hardy perennials.

Most valuable plants, succeeding almost anywhere. When grown in large beds hooped over, and the plants trained to the hoops, the effect produced is splendid. Trained on trellises, or against rustic fences, the effect is grand. Planted on old walls, in old stumps of trees, vases, rustic baskets, or fissures in rock formations, and allowed to droop over, they are matchless. On rock-work and amongst old roots and ruins the effect is beautiful. As a pot plant and for hanging baskets they are valuable, continuing in beauty till very late in the autumn. Sown in March and April they commence flowering in June and July.

1911	Petunia grandiflora choicest mixed, embracing the very best English varieties only, 1½ ft. 1s. &	2 6
1912	" choice mixed, from large flowered foreign varieties, 1½ ft.....	2 6

2036	" new golden flowered, 3 ft.		○
2037	" new purple, 3 ft.		○

PRIM'LLA. Nat. Ord. *Primula'ceæ*. Charming greenhouse perennials, etc.

For winter decoration *Primula Sinensis* is amongst the most important of greenhouse plants, and it is of the first moment that the seed should be from the finest fringed flowers. It is well known that several of the growers at Covent Garden Market are noted for their *Primulas*, the flowers being large, rich in colour, and of great substance, while the habit of the plant is robust and the flowers stand well above the foliage. It is from this style of plant the seed we offer has been saved, and it is unsurpassed. We mention this simply on account of the pretensions put forth by some houses, intended to make believe that they and they only possessed this Covent Garden quality of *Primula Sinensis*.

2038	Prim'ula Simen'sis	mixed, Barr's select Covent Garden strain, the finest, $\frac{3}{4}$ ft.	2/6 &	3	
2039	"	fine mixed, $\frac{3}{4}$ ft.	2/6 &	3

PYRE'THRUM (Golden Feather), Nat. Ord. *Compositæ*. Splendid hardy perennials.

		The Golden Feather Pyrethrum is indeed the garden's friend, always to be relied upon. In spring it looks like masses of gold; in summer it relieves the sombre lines, lighting up the whole garden, and harmonizing with everything, pre-eminently with green. At Bletchere Park the finest carpet beds, perhaps ever seen were formed with Alternanthera and small plants of the Golden Feather. Plants should never be propagated but raised from seed, as seedlings often continue longer in condition. Sow several times a year under glass, or in any shady corner out of doors. Golden Gem is recommended for ribbons or lines where the white flowers as well as the yellow foliage are considered a desideratum.
2072	Pyre'thrum	Golden Feather, golden foliage, 1 ft. 6d. &
2073	"	Golden Gem, golden foliage, 1 ft.
2074	"	atrosanguin'eum, rich crimson, 1½ ft.

2079	"	choicest mixed double, 1½ ft. 1s. &
2080	"	" " single, 1½ ft. 6d. &

It would be impossible to speak too highly of the New Double Pyrethrums, their large Aster-like flowers are charming in May and June, and again in autumn. It is more satisfactory to purchase these as plants, and we can at all seasons supply them in pots ready to plant out; 9s. 12s. and 18s. per dozen. List on application.

RANUNCULUS, Nat. Ord. Ranuncula'ceæ. Beautiful early summer flower.

2081 *Ranunculus Asiaticus superbus*, large brilliant colours, flowers the first season, ½ ft. 6d. & 1 c.

RHODAN'THE, Nat. Ord. *Compositæ*.

Half-hardy everlasting annuals.

RICINUS, Nat. Ord. *Euphorbia'ceæ*. Highly ornamental foliage plants.

Picturesque, gigantic, umbrageous, elegant foliage plants, which in autumn are studded with grotesque fruit. As specimens on the lawn or terrace they are unsurpassed, while for the Sub-tropical garden they are indispensable. In shrubby borders, and by the sides of ravines, rivulets, and lakes, they impart a majesty possessed by few, if any other plant. From seed they speedily attain gigantic proportions, and are ornamental till destroyed by the frost.

SOLA'NUM, Nat. Ord. Solanaceæ. Ornamental fruit and foliage plants.

The following embrace the most picturesque, and beautiful of this highly ornamental and elegant genus of plants for sub-tropical effect in summer, and conservatory decoration throughout the year. They are mostly of rapid growth, seedling plants soon becoming effective and ornamental. Pyracanthum is a perfect gem; Marginatum conspicuous for its white foliage; Robustum for its massive brown-tinted leaves; Laciniatum and Reclinatum for their exceedingly elegantly divided foliage; Glaucophyllum for its Oleander-like habit and bluish-green leaves; Warscewicziodes for majesty of form is unquestionably the grandest of the Solanums. In this manner the striking characteristics of each might be individually described.

2208	<i>Sola'num acanthocar'pum</i> , a stately branched species, with formidable spines, white foliage and curious spiny fruit, the size of a small orange, 6 ft.....				○ 6

2353	" mixed, 2 ft. } of doors they may be grown in warm situations.	6d. & 1 0

VIOLA (Heartsease or Pansy), Nat. Ord. *Viola'ceæ*. Hardy perennials.

	In the spring flower garden the Pansy (<i>Viola tricolor</i>) blooms continuously, and produces a matchless effect in designs, beds, and ribbons. From seed the colours cannot be implicitly depended upon; they should, therefore, be transplanted from the seed-bed and flowered before finally planting out. Seed sown in spring, flowers during the summer; sown in summer, flowers in autumn. With a little attention, the Pansy can be made a charming	
--	--	--

plant for summer decoration. The varieties of *Viola* are very important, succeeding in situations where the Pansy is a failure. *Viola odorata* varieties flower in winter, and are prized for their fragrance. For plants of *Viola odorata*, see p. 12, and for Pansies and Violas, see Bulb Catalogue, pp. 40 and 41.

2427	" Lockhart's Black Prince, single	6d. & 1 0

Wallflowers are prized for their delicious fragrance. In the spring they are indispensable for beds, groups, and ribbons: the large massive conspicuous spikes of the double German varieties have a charming effect; while the more bushy, compact growth and profuse blooming of the single Wallflowers render them exceedingly attractive. A mass of Golden Queen, with its unalloyed rich golden yellow blossoms, is a sight unrivalled; it may be seen from a great distance, and so profusely does it bloom as to resemble a dense carpet of gold.

ZE'A, Nat. Ord. Gramina'ceæ. Handsome ornamental foliage plants.

Japonica variegata as an ornamental foliage plant is not surpassed in the beauty of its variegation by the choicest stove plants. Caragua is tall and graceful; Gracillima the most dwarf.

2446	Ze'a japon'ica variega'ta, matchless in beauty for conservatory and flower garden, 3 ft.	6d. &	i	0
2447	" Caragua', Giant Maize, very graceful and majestic, 12 ft. to 15 ft. high	0	6
2448	" gracil'lima, the miniature Maize, very graceful and beautiful, 2 ft.	6d. &	i	0

ZINNIA, Nat. Ord. Compos'itee. Splendid half-hardy annuals.

The double Zinnia is one of the sterling novelties of recent years. The flowers are large, beautifully formed, and exceedingly handsome. Few plants in the flower border are more effective, and scarcely any flower when cut, is so beautiful in table bouquets. Well grown in pots it is a useful plant for in-door decoration. The Pumila varieties, which are dwarf and compact, are admirably adapted as pot plants, and valuable for beds. The single Zinnias are also very handsome, while it would be impossible to speak too highly of the double and single varieties of Mexicana for beds, rock-work, and masses in the borders.

2449	Zin'nia el'e-gans double, yellow, carmine, rosy-purple, scarlet, crimson, orange, pink, lilac, white and purple, 1½ ft.	each variety	0	6

ORNAMENTAL CLIMBERS AND TWINERS.

This is an important section of our Catalogue, and fully merits the prominent position assigned to it, as no glass erection, whether conservatory, greenhouse, or stove, can be considered furnished unless the walls, pillars, etc., are covered with Climbers. In the adornment of the flower garden, the harder kinds are invaluable for covering arbours, verandahs, trellises, rustic fences, and forming elegant chains and festoons such as now grace the Royal Horticultural Society's Gardens at South Kensington. For plants of climbers, see p. 75.

ABO'BRA, Nat. Ord. Cucurbita'ceæ. Half-hardy perennial.

2463	Abo'bra viridiflora', an elegant climber, foliage dark glossy green, and with scarlet miniature fruit	0	6
------	---	-------	---	---

ADLU'MIA, Nat. Ord. Fumaria'ceæ. Hardy biennial.

2464	Adlu'mia cirrho'sa, flesh-coloured flowers, and delicate pale green pinnate foliage	0	6
------	---	-------	---	---

AMPELOPSIS, (Virginian Creeper) Nat. Ord. Vita'ceæ. Hardy climbers.

2465	Ampelop'sis hedera'cea, the common Virginian creeper	i	0
------	--	-------	---	---

2466	" heterophyl'l'a, Veitch's Virginian creeper	i	0
------	--	-------	---	---

ARISTOLO'CHIA, Nat. Ord. Aristolochia'ceæ. Handsome climbers.

2467	Aristolochia'chia choice mixed, greenhouse and hardy varieties	i	0
2468	" altis'sima, purple	0	6
2469	" Bonplan'di, purple	0	6
2470	" cilio'sa, purple and green	0	6
2471	" Si'pho, a noble foliage plant, hardy	0	6

These are noble plants, with flowers resin bling the Pitcher Plant, Altissima, Bonplandii, and Ciliosa are for the greenhouse. Siphon is perfectly hardy, and if trained against the house, or verandah, or over arches, the effect of its massive foliage is matchless. On the banks of the Rhine and in most continental cities, the singular foliage of this plant is an object of admiration to visitors.

		Per pkt. s. d.
	ASPAR'AGUS, Nat. Ord. <i>Lilia'ceæ</i> . Hardy perennial.	
2472	Aspar'agus verticilla'tus, a very graceful climber	I 0

For dazzling brilliancy and beauty of flower, the Tacsonias are unsurpassed. Amongst them T. Van Volxemii is pre-eminent, flowers of intense scarlet followed by fruit of a pleasant sub-acid flavour. The varieties are all rapid growers, soon covering a large space, and as the flowers are suspended on long thread-like filaments, they give the roof of the conservatory the appearance of being studded with starlights.

TEC'OMA, Nat. Ord. *Bignonia'ceæ*. Beautiful greenhouse twiners.

		Per pkt. s. d.
2630	Tec'oma capen'sis, orange	1 0

2644	Ha'risi, blue, warm greenhouse perennial	1 0
2645	" mixed from the above 4 perennial varieties	2 6

TROPÆ'OLUM, Nat. Ord. *Tropæola'ceæ*. Half-hardy annual and perennial climbers.

The varieties of *T. Lobbianum* are exceedingly elegant, and remarkable for their richly diversified colours and profusion of bloom. Porter's varieties have finely-formed flowers, and are specially recommended for indoor culture, and during the winter and spring months they keep the conservatory gay, and supply a large quantity of cut flowers. They are all equally suitable for filling flower-beds in summer, covering trellises, chains, pillars, walls, etc. The seed from the self colours usually comes true, but parti-coloured varieties sport very much. *T. Canariense*, the Canary Creeper, with its beautifully fringed rich yellow flowers and pretty foliage, is universally known and admired as a fine climber. *T. Jarattii* is a beautiful greenhouse plant. *T. pentaphyllum* is in the style of *Jarattii*, but hardy, succeeding out of doors in warm situations and in light soils. *Speciosum* is a charming hardy species. Compactum Beauty of Malvern, and all the dwarf compact-growing bedding varieties are described under the heading *Nasturtium*, p. 33.

2646	Tropæ'olum Canarien'se, beautiful bright yellow, pretty foliage	1s. 6d. per oz., 6d. &
2647	" azu'reum, sky blue, very rare greenhouse tuber (roots 3s. 6d. to 5s. 6d.)	2 6

-----------------	-------	---------	-----

MIXED FLOWER SEEDS.

For Shrubberies, Woodland Walks, Railway Embankments, decoration of Wildernesses, etc.,

5s. 6d. per pound, or 6d. per ounce.

Many have availed themselves of the above suggestion, and have scattered the Mixed Flower Seeds on large rockeries and rootries, natural and artificial; in shrubberies, woodland walks, carriage drives, and wildernesses; also, by the sides of rivulets, railway embankments, and wherever a floral display was desired beyond the limits of the flower garden.

For a Summer and Autumn Display, sow during March and April, simply scattering the seed broadcast, at the rate of six or seven pounds per acre, and slightly covering it. It must not be sown amongst grass, but patches here and there might be cleared and the seed deposited, *rolling or trampling the seed into the soil*. For a Spring and early Summer display sow in September and October.

B. and S. test the growth of all Vegetable Seeds immediately they are received from the growers.

BARR & SUGDEN'S COLLECTIONS OF VEGETABLE SEEDS.

These assortments consist of judicious selections from the different sections of the Catalogue, suited to gardens of various sizes; they contain the most approved varieties, and such as are best adapted to secure a succession of vegetables from January to December. However, as the wants of families are so varied, it may be more advantageous for purchasers to order from the body of the Catalogue the quantities and sorts best suited to their requirements, using the Order Sheet which accompanies the Catalogue for this year. In the Order Sheet the names are printed consecutively as they appear in the Catalogue, so that it is only necessary to write in figures the quantity required opposite the name of the article, and, from the name to the quantity, draw a line as represented on the specimen from "Order Sheet," as under, thus:—

Peas.	Qt.	Pt.
Dillistone's Early	2	..
Advancer	1	..

In this way the making out of a general order involves very little trouble, while it greatly facilitates correct and prompt execution.

Cultural Directions are printed on every Packet of Seed.

B. and S. test the growth of all vegetable Seeds immediately they are received from the growers.

SELECT LIST OF VEGETABLE SEEDS.

ARRANGED AND CLASSIFIED ON A NEW PRINCIPLE, AND EMBRACING ALL THE BEST VARIETIES OF VEGETABLES IN CULTIVATION, ESPECIALLY SUCH AS ARE MOST APPROVED IN COVENT GARDEN MARKET.
All orders for Vegetable Seeds amounting to 2*s.* and upwards, carriage may be deducted at settlement of account. Vegetable Seeds offered under the heading "per packet," will be sent prepaid by post, or if sent by Rail (however small the amount of the order), carriage may be deducted at settlement. By this arrangement purchasers are enabled to obtain from our Warehouse small quantities of really superior seeds.

CULTURAL DIRECTIONS ARE PRINTED UPON EVERY PARCEL OF SEED.

Section I.—LEGUMINOUS PLANTS, &c.

NEW PEAS.

Most of these have been awarded First-class Certificates, and having seen them in growth, we have confidence in recommending them.

	s. d.
Dr. Maclean, Dr. Hogg says of this pea:—"It is the finest I ever saw grown, and in quality I cannot name a better, in productiveness unequalled," 4 ft. per oz. 4 <i>d.</i> , per pint 1 <i>s.</i> 6 <i>d.</i> , per quart	2 6
Duchess of Edinburgh (Sutton), a prolific wrinkled Marrow of excellent flavour, having large well filled pods, 5 ft. per oz. 4 <i>d.</i> , per pint	1 6
Giant Emerald (Sutton), the most distinct of wrinkled Marrow peas, 5 ft. per oz. 4 <i>d.</i> , per pint	2 0
Little Wonder (Carter), as early as <i>Advanceer</i> , and with pods like <i>G. F. Wilson</i> , a first class dwarf wrinkled Marrow, 2 ft. per oz. 6 <i>d.</i> , per pint	3 6
Challenger (Carter), described as one of the handsomest, most prolific, and best flavoured of green Marrow peas, 2½ ft. per oz. 6 <i>d.</i> , per pint	3 6
Culverwell's Telegraph, a cross between <i>Veitch's Perfection</i> and <i>Laxton's Prolific</i> ; when cooked, the peas are of a fine deep green colour, flavour excellent, pods very long and very productive, 4 ft. per oz. 6 <i>d.</i> , per pint	3 6
Criterion (Standish), this was one of the late Mr. Standish's favourite seedlings; it is of a strong robust branching habit, 5 to 6 feet high, the pods in pairs, and the peas of a deep green colour per oz. 6 <i>d.</i> , per pint	3 0
Harbinger (Laxton), a cross between <i>Dillistone's Early</i> and <i>Alpha</i> , with the habit of the former; pods small, slightly curved and well filled, good colour and fine flavour, 2½ ft. per oz. 1 <i>s.</i> , per ½ pint	3 6
The Shah (Laxton), an early white wrinkled Marrow, coming into use with <i>First Crop</i> , an abundant cropper, and of excellent flavour, 2 ft. per oz. 6 <i>d.</i> , per pint	3 0
Unique (Laxton), a dwarf form of <i>William the First</i> , and coming into use with <i>Little Gem</i> , very prolific, and of good flavour, 2 ft. per oz. 6 <i>d.</i> , per pint	3 0
Standard (Laxton), Mr. Gilbert describes this as "the best Pea." It has long curved pods, very handsome, prolific, and of excellent quality per oz. 6 <i>d.</i> , per pint	3 0
Dr. Hogg (Laxton), quality equal to <i>Ne Plus Ultra</i> , and coming into use about a week after <i>First Crop</i> , 3 ft. per oz. 6 <i>d.</i> , per pint	3 0
Balmoral Castle, in the way of <i>Supreme</i> , but with longer pods, well filled and borne from top to bottom of haulm, flavour excellent, 4 ft. per oz. 4 <i>d.</i> , per pint	1 6
Commander-in-Chief (Carter), a fine greenish blue wrinkled Marrow, in the way of <i>G. F. Wilson</i> , with long slightly curved pods, and frequently containing as many as 10 large-sized peas in a pod, 4 ft. per oz. 4 <i>d.</i> , per pint	1 6
Fillbasket (Laxton), extremely productive, with long well filled pods, dwarf and profuse, 3 ft. per quart	2 0

The above New Peas, 1 oz. of each, 5s. 6d.

PEAS.

The arrangement and descriptive matter following are the results of personal observations at our Experimental Grounds, and at the Chiswick Gardens of the Royal Horticultural Society.

All new Peas, or old Peas with new names, which are not quoted by us, can be supplied at advertised prices; but intending purchasers of either of these two classes would do well to read the Report of the last important Pea Trials conducted at the Royal Horticultural Society's Gardens at Chiswick. It will be found in the Journal of Horticulture, 14th and 21st Nov., 1872. The Report is very full, fair, and unbiased in dealing with the would-be novelties in Peas which for years past have been foisted upon the public, unintentionally, perhaps, on the part of the introducers, but complimentary in the highest degree to the Peas which they had re-christened. No two Peas, perhaps, have more synomyms, and no two Peas are to be matched in quality with the British Queen and *Ne Plus Ultra*. Nine-tenths of the new Peas, excepting, of course, Mr. Laxton's hybrids, are either British Queen or *Ne Plus Ultra*. The Vegetable Trials at Chiswick, which are being conducted under the very able management of Mr. Barron, the superintendent, will prove of great advantage to the gardening community, exposing, as these trials do, the fabrication of new names to standard varieties, giving due importance to bona fide introductions, and also encouraging growers to maintain pure "stocks."

The varieties of Peas, and also other vegetable seeds which we enumerate and describe, are the best representatives of their classes. We mention this as, in our present edition, we have omitted the descriptions to many names, but have fully described the varieties most worthy of cultivation.

Division I.—THE EARLIEST ROUND-SEEDED PEAS.

If sown from November to February, will be ready to gather in May and June.

	per qt.
	s. d.
First Crop, syn. <i>Ringleader</i> , and <i>Dillistone's Early</i> , the earliest variety, 2 ft.	1 6

Princess Royal, a very productive fine variety, with long well-filled pods, 3 ft.	1 0
Prizetaker Green Marrow, a very productive, fine dark green-podded variety, 4 ft.	0 10
The following, 1s. to 1s. 6d. per quart:—Dwarf Waterloo Branching, Champion of Paris, Excelsior Marrow, Bellamy's Marrow, Noble's Green Marrow, Rising Sun, Leicester Defiance, &c.	

Division III.—ROUND SEEDED PEAS, SUITABLE FOR MAIN CROP.

If sown from February to May, will be ready to gather from the middle of July to the middle of August.	
Blue Scimitar, esteemed by market gardeners and farmers, 2½ ft.	0 10
Burbridge's Eclipse, a good succession to Blue Peter, dwarf and prolific, 2 ft.	1 0
Flack's Victory, a branching, productive, useful variety, 3 ft.	1 0
Laxton's Superlative, the longest and largest podded pea in cultivation, 6 ft.	1 6
Mossy Podded, a very productive variety, remaining a long time in good condition for table, 6 ft.	1 6
Victoria Marrow, very productive, pods large and well-filled, peas of fine flavour, 6 ft.	1 0
The following, 1s. to 1s. 6d. per quart:—Blue Sabre, Beck's Eclipse, Stubb's Dwarf, Bedman's Imperial, Blankney Marrow, Australian, Grotto Pea, Oyster Pea, Waterloo Giant, Tall Marrow, Gibbs' Defiance, &c.	

Division IV.—THE EARLIEST WRINKLED MARROW PEAS.

If sown in March or April, will be ready to gather in June and July.	
Alpha (Laxton) "The First Crop" of Wrinkled Marrows: earliest, and richest flavoured, 3 ft.	2 6
Early Premium Gem, in the way of Little Gem, but more robust, 1 ft.	2 0
Little Gem (Maclean), valuable for small gardens, for early forcing, and sowing in sheltered situations, 1 ft.	1 6
Advancer, an exceedingly fine-flavoured early variety, coming into use seven days after Alpha, 2 ft.	2 0
Multum in Parvo (Nutting), a fine variety, three days later than Little Gem, and with broader pods, 1½ ft.	2 0
Nutting's No. 1, syn. Garter's White Gem, a remarkably handsome, fine-flavoured early variety, 2 ft.	1 6

Division V.—SECOND EARLY WRINKLED MARROW PEAS.

If sown in March, April, and May, will be ready to gather in July and August.	
Champion of England, an abundant cropper, fine-flavoured, and a first-class variety, 5 ft.	1 3
Forty-Fold, a first-class flavoured, Champion of England variety, with long well-filled scimitar pods, 5 ft.	1 6
Huntingdonian, the best variety of the "Champion of England" section, a splendid cropper, 5 ft.	2 6
Laxton's Popular, in the way of Champion of England, a fine variety, 5 ft.	1 6
Ne Plus Ultra, peas dark green, and when cooked of a very rich and agreeable flavour, 6 ft.	1 6
Prince of Wales, a fine variety, heavy cropper, fine flavoured, an improved Alliance, 3 ft.	2 0
Maclean's Wonderful, a rich-flavoured, free-cropping, productive variety, with large pods, 3 ft.	1 6
The following, 2s. to 2s. 6d. per quart:—Jeyes' Conqueror, Callingsford's Champion, Payne's Conqueror, Champion of the World, Edwards' Invincible, &c.	

Division VI.—WRINKLED MARROW PEAS, the best for Main Crop.

If sown in March, April, and May, will be ready to gather in July, August, September, and later.	
British Queen, one of the very best late varieties, an abundant cropper, and fine-flavoured; in mild seasons in some localities it blooms and pods till very late in autumn, 6 ft.	1 6
Hay's Mammoth, in the way of British Queen: a first-class standard variety, 6 ft.	2 0
Tall Green Mammoth, a high class green pea, fine flavour, with long well-filled pods, freely produced, 6 ft.	2 0
G. F. Wilson, one of the very best varieties in the way of Veitch's Perfection, but a week earlier, 4 ft.	2 0
James' Prolific, a first-rate variety, with large well-filled pods, 4 ft.	2 0
Laxton's Omega, one of the latest and best in the way of Ne Plus Ultra, 2½ ft.	2 0
Premier, a remarkably fine pea, very productive, rich in flavour, and of fine constitution, resembling Veitch's "Perfection," but of more universal adaptation, 3 ft.	2 0
Veitch's Perfection, a first-class variety, with large well-filled pods, freely produced, flavour superior, 3 ft.	1 6
The following, 1s. 6d. to 2s. 6d. per quart:—Carter's Victoria, Great Britain, Shanley Marrow, Rollinson's Victoria, Imperial Wonder, Hooper's Incomparable, Carter's Leviathan, Wonder of the World, McMillan's Queen of the Marrows, Williams's Emperor of the Marrows, Champion of Scotland, Tall White Mammoth, Ward's Incomparable, Will Watch, King of the Marrows, Competitor, Strathmore Hero, The Prince, Best of All, Hair's Dwarf Mammoth, Yorkshire Hero, Knight's Tall Marrow, Knight's Dwarf Marrow.	

Division VII.—EDIBLE PODDED OR SUGAR PEAS.

On the Continent much esteemed; the pods are gathered young, boiled whole, and served up with white sauce.	
Tall very large edible podded Sugar Pea, this is the finest of the class, 4 ft.	2 0

NEW BROAD BEANS.

The Royal Horticultural Society, at their Chiswick Gardens, did good service in their trial of Broad Beans. They certificated two notably fine sorts, Seville Long Pod and Mammoth Long Pod, and it is to be hoped that this will give an impetus to improving the stocks of this esteemed vegetable.	
Seville Long Pod, the earliest of the broad beans and the longest podded, height 2 ft.; first-class certificate per quart	s. d.

Mammoth Long Pod (Carter), a remarkably well-selected stock of long-pod bean, very productive, and pods well filled, height 3 ft.; first-class certificate per quart	s. d.
"Pedigree" Windsor (Hardy), intermediate between the Windsor and Long Pod; the pods are well filled, it is an excellent cropper, and a useful variety, 3 ft. per pint 1s., per quart	x 9

"Pedigree" Green Windsor (Hardy), this fine variety differs from the preceding in having green seed, and therefore by some is more highly esteemed, 3 ft. per pint 1s., per quart	x 9
BROAD BEANS. per qt.—s. d.	

Early Long Pod, early and very prolific, 3 ft.	0 8
" Mazagan, very early, hardy, and bears freely, 3 ft.	0 8

" Tom Thumb, syn. Dwarf Cluster and Marshall's Prolific Fan, a useful dwarf white variety, 1 ft.	x 0
" Green, syn. Beck's Gem, a valuable dwarf green variety, 1 ft.	x 6

Johnston's Wonderful Long Pod, fine flavoured and productive, 3 ft.	0 10
Mackie's Monarch Long Pod, very heavy cropper, fine flavoured, 3 ft.	0 10

Minster Giant Long Pod, very productive and long-podded, 3 ft.	1 0
Nonpareil Green Long Pod, when cooked of a delicate green colour, 3 ft.	1 0

Taylor's Large Windsor, the best for general crop, beans very large, 3 ft.	1 0
Improved Large Windsor, very large pods and productive, 3 ft.	x 6

Green Windsor, prized on account of its delicate colour when cooked, 3 ft.	1 0
OUR OWN SELECTION.

NEW DWARF FRENCH BEANS, &c.

The important trial of French Beans at the Royal Horticultural Society's Gardens at Chiswick to determine the best varieties and ascertain the synomynes, resulted in the certificating of several sorts. Amongst these the Butter Beans are noteworthy additions to our culinary vegetables. The pods being skinless, are boiled and served whole. On the Continent these varieties are considered a delicacy.

Dwarf Butter Bean, white seeded, 1 ft. }	Pods 3 to 4 inches long, thick, fleshy, and of a pale	{ per pint	2 0
Dwarf Butter Bean, black seeded, 1 ft. }	lemon colour, very productive.	"	2 0
White Advancer (Carter), a very long-podded, white seeded variety, remarkable for its great productiveness, and coming in quickly, valuable for general crop	per pint 1s. 3d., per quart	2 0
Canadian Wonder, a remarkably productive long-podded variety, with long fleshy pods which boil	2 6
remarkably tender and of a good colour, an excellent variety for forcing	2 6
New Early Forcing (Osborne), of all the forcing varieties of dwarf beans this is decidedly the best, both as to quality and productiveness	per pint 1s. 3d., per quart	2 0
Early Prolific (Williams), remarkable for its earliness, abundant produce, and fine quality, 1 ft.	1 6
New Early White Canterbury, described as a first-class variety, very productive; valuable for forcing, per pt.	1 6
New Dwarf Scimitar, valuable for forcing or main crop	per pint, 1s. 6d., per quart	2 6

FRENCH OR DWARF KIDNEY BEANS.

Canterbury White, very prolific, well known, 1 ft.	per qt.—s. d.
Chinese Long-podded, exceedingly productive, free cropping variety, 1 ft.	1 6
Colchester Red Speckled a well-known prolific variety, 1 ft.	1 6
Dun, Cream-coloured, or Yellow, much esteemed for its earliness and free cropping, 1 ft.	1 6
Fulmer's Early Forcing, a fine variety for forcing, very productive, 1 ft.	2 0
Negro Long Podded, very fine cropper, 1 ft.	2 0
Newington Wonder, the best of all for forcing, very productive, 1 ft.	2 0
Sion House, a fine forcing variety, 1 ft.	2 0
Sir Joseph Paxton, an exceedingly early and very productive variety, fine for pot culture, 1 ft.	2 0
The following 1s. 6d. to 2s. per quart:—Wilmot's Forcing, Mohawk, Scarlet Giant, Scarlet Flageolet, Early Warwick, Purple Speckled, Black Speckled, Early Six Weeks, Prince Albert, Pheasant's Eye, &c.

NEW RUNNERS.

Under this heading we enumerate a few sorts of Runners deserving of special attention. Amongst these we would specially notice the wax-podded varieties, the pods have no inside lining, and like the Butter Beans are cooked and served up whole, and are a very delicate dish.

Harcourt d'Algiers, wax-podded butter beans	per pint	r 6
Butter Bean, Mont d'Or, this valuable variety has pods 6 to 8 inches long, thick, fleshy, of a pale lemon colour, and produced abundantly; it is a vigorous grower, and should be supported with stakes 5 ft. high	1 6
St. Joseph Wax or Butter beans	1 6
Purple podded butter beans	1 6
Champion Scarlet Runner, pods very long, thick and fleshy	per quart	2 6
The Cuban Asparagus Runner, an interesting variety of Dolichos, with abundant foliage and long delicate pods which are cooked like French beans, very ornamental climber.	0 6
New Zealand Runner, very productive	per pint	1 3

RUNNERS OR TALL FRENCH BEANS.

Eclipse, or Giant White, very long pods, produced in clusters, and in great abundance	per qt.—s. d.
Scarlet, exceedingly prolific	2 0
York and Lancaster, or Painted Lady, very ornamental and prolific	2 6
White Dutch, or Case Knife, very productive	1 6

Section II.—EDIBLE LEAVED AND EDIBLE FLOWERED PLANTS.

(By Edible Flowered Plants are meant those, the inflorescence of which is used as a vegetable, such as Cauliflower, etc.)

ARTICHOKE, GLOBE.

The Artichoke is an exceedingly ornamental plant, and, as a vegetable, deserving of universal cultivation. The immature heads are boiled till tender, and served up cold or hot. The fleshy lower part of the scale is eaten with a relish usually made from vinegar, pepper, and salt. Butter sauce in English cookery books is usually recommended as the accompaniment, but with this the Artichoke is insipid.

Green Provence	per packet, 4d.; per oz., 1s. Purple Provence	per packet, 4d., per oz., 1s. 6d.

BEET (EDIBLE LEAVED).

Spinach Beet, the leaves in summer are much prized and by many preferred to Spinach	s. d. s. d.
Seakale Beet, the mid-rib of the leaf is two to three inches broad, very white, delicate in flavour, and in summer and autumn is an excellent substitute for Seakale	0 4..0 8

For edible-rooted Beet, see page 57.

BORECOLE OR KALE.

On all hands it is asserted and accepted as a fact that the varieties of the Brassica family are liable to great variations, and no doubt this is correct, especially in the higher forms, such as Broccoli, Cauliflower, and Cabbage. This sportive character is made a pretext, however, for the confusion that exists amongst the names of Kales, but after several years' careful comparative tests—if we are to judge from the extreme purity of the stocks procured from a great variety of sources, and from which we conducted our experiments—we are of opinion that either great care is exercised by the growers in keeping the Kales pure, or they are not liable to sport, as we could see no deviation in our trials from the normal or typical forms of the plants; although there was any amount of variation in the names applied to the same variety of Kales.

The Kales we have enumerated are accurately described, so that any one interested in the subject will readily identify the varieties, and they are the only sorts really worth cultivating for culinary purposes.

Cottager's Kale, plants purple, or green; the leaves in most cases crimped or curled at the margin; the plant tall and robust, yielding in spring a large crop of side-shoots, exceedingly delicate in flavour. Meopham Court Kale is simply the green variety selected from this

0 4..0 8

	per pkt. per oz.
	s. d. s. d.
Chou de Milan ; in respect to height and robustness this resembles Cottager's Kale, the leaves are of a bluish-green tint, and mostly plain: in spring it yields a large supply of side sprouts, which are particularly delicate in flavour.....	○ 4..0 8
Euda Kale , this might be called a dwarf Chou de Milan; Leaves dull bluish green, with white veins; in spring it throws up a large quantity of shoots, which, when cooked, eat like marrow; but if these are blanched, by placing a seakale pot over the plant, the delicacy is increased	○ 4..0 9
Egyptian , differs from Euda mainly in its richer green leaves and more prominent white veins; in spring it throws up a large quantity of shoots, which may be used green or blanched as we have recommended in the case of Buda Kale	○ 4..0 9
Jerusalem Green Curled , syn. <i>Acme Kale</i> , the growth is dwarf but sturdy, the margin of the leaves crisped or curled very much, and the partially undeveloped centre leaves are tinged on the tips with purple, and the veins are of a subdued crimson colour; in the spring this plant throws out numerous long stout succulent shoots, and is believed by many to be the true "Asparagus Kale"; these tender shoots may be cooked either green or blanched.....	○ 4..0 9
Ragged Jack ; the leaves are green, beautifully laciniated, and, especially the young foliage, prettily crisped; in spring it yields a large quantity of sprouts of a delicate flavour	○ 4..0 8
Scotch Tall Green Curled , extremely hardy and very productive of side-shoots during spring; this and the other varieties of Scotch Borecole or Kales are well known and universally appreciated	○ 4..0 8
" Dwarf Green Curled or Feathered , a very valuable stock	○ 4..0 9
" Prince of Wales , an excellent selection, stem much feathered with sprouts	○ 4..0 9
" New Imperial Hearting , very productive of sprouts in spring	○ 4..0 6
" Tall Purple Curled , this differs from the green simply in colour, which is dark purple; it boils very tender in the winter, and is very productive of side-shoots in the spring	○ 4..0 8
" Dwarf Purple Curled , resembling the tall, but so dwarf as to lay quite on the ground	○ 4..0 8
The above Kales are the most desirable for culinary purposes; the coarser-growing cattle kinds are enumerated under the head of Agricultural Seeds.	

In clearing up the confusion which exists in the names of this section of the Brassica family, the following, in black letter, had no distinct Kales to represent them, one or other of the varieties above described being supplied, and the names of such as were supplied are given in italics:

For **Delaware**, were supplied, *Jerusalem* and *Buda*. For **Siberian**, *Egyptian*. For **Lapland**, *Egyptian*, *Buda*, and *Dwarf Purple Curled*. For **Victoria Marrow**, *Couve Tronchuda*. For **Miller's Winter**, *Egyptian*. For **Camberwell**, *Ragged Jack*. For **Prussian**, *Jerusalem*.

Asparagus Kale demands a special notice for itself. Under this name many seedsmen sell *Couve Tronchuda*; which is the Portugal or Braganza Cabbage, exceedingly delicate in flavour, and should be grown universally; but we object to the name "Asparagus" being attached to it; the leaves are more like blanched sea-kale. See our remarks, page 57. *Buda Kale* is also sold under this name, and not inappropriately so; in the spring it throws up an immense quantity of shoots, which may be blanched and served as asparagus. *Jerusalem* is likewise sold under this name, and we think it is the plant to which the name was originally attached. Under this name is also sold *Chou de Milan*. Even *Ragged Jack* is made to do duty, as also *Egyptian Kale*. Our object in making this statement is that our customers may select their own *Asparagus Kale*.

ORNAMENTAL KALES FOR WINTER DECORATION.

per pkt. per oz.

Variegated Triple Curled Improved (Melville). For distant effect, winter beds may be formed of these, likewise groups, or single specimens in flower or shrubbery borders. The colours range from the purest white to the richest purple-crimson, and when lit up by the winter sun are splendid. As soon as the plants in the seed bed are large enough, transplant a goodly number into a poor soil and an open situation. In autumn, when the colours are sufficiently developed, select the most beautiful, breaking off the large under-leaves, and arrange according to taste, planting sufficiently deep to bring the head close to the surface of the soil	I 0...2 6

Section III.—EDIBLE ROOTED PLANTS.						
BEET.						
In our Experimental Grounds the varieties marked * have been tested and found perfectly pure; our customers may, therefore, confidently rely upon the seed producing fine roots of uniform size and quality.						
For Illustrated Report of Beets grown at our Experimental Grounds, see "Gardeners' Magazine," 1870.						
* In the process of cooking, Beet is frequently made hard and unpalatable, and the seedsman or gardener made to bear the consequences of the cook's shortcomings. Following up our experimental trials, we have looked into the cook's department, and offer to our readers the following conclusions :—						
1. In preparing Beet for cooking, the greatest care must be taken not to bruise the skin, or in any way wound the root ; and if by accident any injury has been done to the root, bake and not boil it.						
2. If a deep crimson hue is the colour preferred in the Beet, or a firm flesh, this is best attained by baking.						
3. If a light, clear bright colour is desired, or a soft, juicy flesh, then boiling will secure this.						
4. If a rich, agreeable flavour is sought for, then select the variety which, before cooking, has the most purple in it, and the flavour may be discovered by masticating a small portion of an uncooked root. If np to the mark, it will leave a rich agreeable flavour on the palate, without any sensation of astringency in the throat. Barr's selection of Nutting's Beet has the desired qualities in the highest degree.						
5. Crimson-flesh Beets are all very rich in flavour ; but when masticated uncooked, an astringency will be discovered as above described ; this class of Beets, however, has its advantages, inasmuch as it can be sown earlier. Barr's selection of Pine Apple Beet is the most desirable of these ; it may be sown very early and will not run to seed.						
6. Scarlet-flesh Beet possesses least of the saccharine flavour, and Nonpareil best represents this class.						
Cattell's Dwarf Purple Top, purple flesh, a good useful variety for those who prefer largish roots						o 4...1 0
Covent Garden Superfine Salad, a remarkably handsome fine flavoured variety						o 6...1 6

ONION.

The Fruit Committee of the Royal Horticultural Society awarded to us in 1869 a special certificate for the largest and finest Collection of onions ever exhibited before them. A report of these at the period will be found in the "Gardeners' Chronicle" and the "Journal of Horticulture." In the "Gardeners' Weekly Magazine," in connection with the report, will be found illustrations of the different types of Onions, from specimens supplied by us, and grown at our Experimental Grounds.

Our Collection of Onions represented the varieties cultivated in this country, and also in Germany, France, Holland, and Portugal (the seed from Portugal being received from the British Consulate at Oporto); our object was to ascertain if the Onion of the grocers was peculiar to Portugal, or had a representative in this country. From a very careful examination we arrived at the conclusion that the Onion of the grocers is fairly represented, both as regards shape, size, and produce, in our brown-skinned varieties of Globe, James's Keeping, and Pear-Shaped, a preponderance of the Pear-Shaped being amongst those grown by us from the Oporto seed. We also found that the Tripoli varieties of Onion produced with us under ordinary treatment much larger bulbs than the Oporto Onion, while the autumn-sown Trebons stood out prominently for size and symmetry, thus proving that those fine imported Onions of the grocers are the result of a favourable climate, combined with the special attention which is given to the cultivation of this bulb in Portugal. Mr. Standish of Ascot by means of superior cultivation produced from the Oporto seed as fine Onions as any imported.

One of the subjects which the Royal Horticultural Society had in hand during 1875 and 1876 was the Onion. The result of the trial has been fully reported in the various gardening periodicals, where the subject has been dealt with in a broad and very satisfactory manner. This is one of the instances illustrating the important national work which is progressing in connection with this Society, notwithstanding the conflicting interests which have kept it in an unsettled state for the last few years. From the results of this and similar experimental trials which are constantly going on at Chiswick under the able management of Mr. Barron, it is to be hoped that horticulturists will rally round the Society more than they have hitherto done, so that by its operations at Chiswick, it will be able to carry out more fully than it has hitherto been enabled to do the great national work for which it was brought into existence.

We have re-arranged our list of Onions, so as to have the allied varieties under their respective heads; this we hope will be found serviceable to our customers in selecting. The first and second groups represent the Flat Onions; the third the Globe-shaped; the fourth the Italian Onions; the fifth the Silver or White Skinned Onions. The last two groups are mostly sown in Autumn for early use; when sown in Spring they should be used early in the Autumn.

Trebons. This extraordinary Onion is matchless for its quality; for Exhibition purposes it may	per pkt.	per oz.	s.	d.
fairly be called the Prize-taker; its great size and beautiful symmetry make it conspicuous above all others. It is equally valuable for Spring or Autumn sowing	o	0...2	6	
Taplin's Banbury Improved. This is an exceedingly fine selection of Spanish Onion, remarkable for its great size and good keeping qualities	o	0...0	...

Section V.—SALAD PLANTS.

BARBE DE CAPUCIN. A fine winter Salad.

This is the most wholesome and agreeable of winter salads. Sow in May, and in autumn lift the roots and store them in a dry cool situation. As required for succession, plant portions of them in boxes of soil in a dark warm cellar or mushroom-house. They soon produce long blanched leaves abundantly, gathered ready for use.....

WITLOEF, A NEW VEGETABLE.

Those who are fond of the salad known as Barbe de Capucin, will esteem the Witloef highly. The seed is sown in June, and the roots as required are lifted from the end of October to February. They are then divested of their leaves to within two inches of the ground, planted in a trench and covered with 2 or 3 feet of stable litter. As the heat generates, the root throws up from the crown a pale green head, resembling a Paris Cos Lettuce, which is eaten as Salad, or cooked and served as Seakale.....

DANDELION.

The blanched leaves of this plant in Spring make a most delicately flavoured and wholesome salad. The roots may also be treated in the same way as recommended for Barbe de Capucin.

New French large leaved per packet i o | New French thick leaved..... per packet i o

CELERIY.

At the Chiswick Gardens of the Royal Horticultural Society, good service was done in 1874, by a very carefully conducted trial of Celery, in which was elicited the important fact that in this country the really distinct typical Celeries do not exceed four in number, and that the multitude of names are either synonymous, or represent merely trifling variations. Celeriac, or Turnip rooted Celery, is not included in the above remark, its cultivation, we regret to say, being very limited in this country. The examination of the different stocks of Celery grown at the trial, showed the importance of careful selections; still it is noteworthy that the best selected stocks of Celeries are only presentable at table in proportion to the care bestowed on their cultivation, trenching the soil and heavily manuring are indispensable, and during dry weather abundance of water should be given from time to time, to keep the plants growing. The first four Celeries in our list are representative types.

per pkt.—s. d.

Covent Garden Dwarf White, close habit, very solid, crisp, juicy, and fine flavoured.....	6d. & i o

Wright's Grove red and white.	Seymour's Superb white.	Turnip Rooted, Celeriac.
Williams' Matchless red.	Carter's Incomparable crimson.	Leicester red.
Wandless Invincible.	Turner's Incomparable white.	Manchester Champion.
Cole's Defiance red and white.	Soup Celery.	Ivery's Nonsuch.

CHEEVIL.

The young leaves are much esteemed, they impart a warm aromatic flavour to soups and stews, and are also in demand for the piquancy they impart in mixed salads. Sow in succession from March to July.

Curled..... per oz. o 6 | Sweet Scented per pkt. i o

CORN SALAD, OR LAMBS' LETTUCE.

Extensively cultivated for the markets of Covent Garden and Paris, forming an exceedingly agreeable variety in salads during the autumn, winter, and spring months.

Large leaved	per oz. o 3	Spoon leaved, an excellent variety	per oz. i o
Italian, or broad leaved.....	" o 6	Lettuce leaved, large leaved variety	i o

CRESS.

Australian Salad, or Golden-Leaved, delicately tender, and with an agreeable piquant flavour.

For summer and autumn use sow in succession from March to August, watering freely in dry weather, and thinning the plants out sufficiently. For winter use sow in September and October, thinning out 3 to 6 inches apart. In spring the leaves are succulent and refreshing ...

Broad-leaved Garden, larger leaved than "Plain Cress," and by some preferred

per oz. per pt. per qt.

Plain leaved, sow at intervals of a few days all the year round

o 2...i 3...2 o

per oz. per pt.

Extra fine Curled, or Normandy ; the flavour of this Cress is very agreeable for the first two or three cuttings, and on the breakfast table it is always acceptable

o 3...i 6

Winter, or American, this resembles the Water-Cress, and is quite as agreeable. By sowing in July and August, a constant supply may be had throughout the winter and spring months ...

o 6... ...

Water-Cress, sow in prepared places in sluggish brooks, and moist situations.....

o 6...i 6

Water-Cress, true Erfurt Sweetest, a small delicate green variety, more esteemed than the ordinary sort, from its being less pungent and of a more agreeable flavour.....

i s. and 2 6... ...

ENDIVE.

This valuable plant should be grown by all who devote even a small portion of ground to salads. The Scarole or Batavian Endive is described in "The Parks, Promenades, and Gardens of Paris," by Mr. W. Robinson, as occupying a first position amongst French salads, the Paris markets being supplied abundantly with it in autumn, winter, and spring, the growers tying it up to blanch five days before cutting.	per pkt. per oz.

LETTUCE.

In our Experimental Grounds in 1871, we grew about 600 different samples of Lettuce; and those enumerated are a selection of the best, but any others offered in the trade can be supplied if required.

To have Lettuce of really fine quality, let the ground be trenched and thoroughly enriched, giving the plants abundance of water during dry weather.

COS LETTUCE.

Cos Lettuce.	per pkt. per oz.
Covent Garden Summer Giant White, a first-class variety, forming large close compact hearts, crisp and fine-flavoured, and not soon running to seed.....	s. d. s. d. 6d. & I 0...2 6
Covent Garden Summer Giant Green, a first-class variety, large, crisp, and fine-flavoured, forming close compact hearts, like Giant White Cos, and the best of its kind	6d. & I 0...2 6
Covent Garden Winter Brown, black-seeded, the hardiest and best of the Brown Cos varieties, specially recommended for autumn sowing; it is crisp, rich, and nutty in flavour, and should be tied up for a few days before being cut. In families, where a dry, nutty-flavoured lettuce is preferred, this is the one grown throughout the year	6d. & I 0...2 6
Covent Garden Winter Giant White. This exceedingly fine variety possesses all the good qualities of the Summer Giant White, and with the hardiness of the Winter Brown Cos; it is, therefore, confidently recommended both for autumn and spring sowing.....	6d. & I 0...2 6
Jefferies' Little Queen, described as forming a solid heart much earlier than any other Cos	I 0... ...
Walker's Covent Garden Sugarloaf, or self-folding Brown Cos, an excellent self-heating lettuce, suitable for summer culture on good soils, but as a winter lettuce it excels. It is very hardy, and by far the best of the self-folding Black Seeded Brown Cos	6d. & I 0...2 0
Dimmick's Victoria, a large White Summer Cos of excellent quality	I 0... ...

THE POTATO.

HIGH-CLASS NEW VARIETIES OF THE POTATO,

Which have been awarded First-Class Certificates by the Royal Horticultural Society, and which we offer and recommend with the utmost confidence of giving satisfaction.		s. d.
Covent Garden Perfection, Mr. Shirley Hibberd says of this variety:—"It is distinct, of remarkably fine quality, and the very model of a potato for a gentleman's table."	per lb. 1s., per 7 lbs.	6 0
McKinlay's Pride, a very handsome early white kidney, of first-rate quality, remarkable for its uniformity of medium sized potatoes, and possessing the rare merit of coming rapidly to maturity, and keeping in good condition till the following year's crop is ready. It is particularly free from disease, and an abundant cropper	per lb. 2s. 6d., per 7 lbs.	15 0
Grampian, this fine new potato is unequalled in beauty and quality. It is very productive, and a valuable addition to this important class of vegetables	per lb. 1s. 6d., per 7 lbs.	9 0
Porter's Excelsior, very handsome, of excellent quality, a great cropper and very early, equally valuable for garden and field culture and a first-class exhibition variety	per lb. 1s., per 7 lbs.	6 0
Schoolmaster, a very high-class rough-skinned round potato, of a very distinct character, and a most valuable variety	per lb. 9d., per 7 lbs.	4 6
Fenn's Perfection Kidney, a handsome smooth form of Lapstone, the produce of a graft of the Yorkshire Hero and Onwards, the earliest and handsomest of the Lapstone family	per lb. 9d., per peck	7 6
Fenn's Rector of Woodstock, tubers flattish round, and handsome, one of Mr. Fenn's famous varieties, floury, and of excellent flavour	per lb. 6d., per peck	5 0
Fenn's Bountiful, true kidney shape, exceedingly handsome, and of a reddish colour, flesh yellow, very floury, and of more than usually fine flavour, second early	per lb. 6d., per peck	6 0
Fenn's Early Market, large flattish round, of superb quality, dwarf haulm	per lb. 9d., per peck	7 6
Alpha, a high-class dwarf early American potato, adapted for garden or frame culture, flesh very white, dry, and firm, flavour excellent, a good acquisition	per lb. 9d., per peck	7 6
Snowflake, above an average size, half round, very even and regular, skin slightly rough; flesh white and floury, very handsome, and an immense cropper, second early	per bush. 1s., per peck	4 6
Eclipse Kidney, very handsome, white, floury, of fine flavour, and very prolific	per lb. 9d., per peck	7 6
Brownell's Beauty (Vermont Beauty), light red and very large; flesh white, and of excellent quality, a very heavy cropper, in the way of Red-skinned Flourball, but inferior	per bush. 1s., per peck	4 0
Ruby, a new first early red kidney, very handsome and of excellent quality	per lb. 9d., per peck	7 6
Climax (Bressee), flesh white, floury, and of exceedingly fine quality; having been in cultivation now several years, its reputation is established as a high-class variety	per bush. 1s., per peck	3 6
Blanchard, as a late potato, in point of quality and productiveness combined with a handsome tuber, this new variety can be confidently recommended	per lb. 6d., per 7 lbs.	3 0

ROUND POTATOES.

The following standard varieties are well known and highly esteemed:—

		per peck of 14 lbs. bush.	per bush.
		s. d. s. d.	
Early Giant King, the earliest round potato, an immense cropper, and not liable to disease.....		3 6...12	6
Early Red Emperor, this is a most distinct second early variety, a great cropper, and of high class quality, very free from disease, and should be universally cultivated for main crop: we have this season a fine stock of this very valuable potato	per lb. 6d.	5 0...16	6
Early Dilmiski, large round, nearly smooth, and very handsome; flesh white, floury, and of superior flavour, a heavy cropper, and uniform in size, the best of early round potatoes for exhibition.....		4 6...16	0
Dalmahoy, a very excellent second early Regent		3 6...12	0

RHUBARB ROOTS, Prince Albert, Linnæus, Victoria, and other varieties.—Strong, 1s. each; 10s. 6d. per dozen.

RHUBARB ROOTS, Johnston's St. Martins. This is one of the finest of all the Rhubarbs; it is early, of fine flavour, and requires less sugar than the Victoria, each 1s. 6d., per dozen 15s.

GRASSES, ETC.

FOR LAWNS, CROQUET AND CRICKET GROUNDS, PUBLIC PARKS, PLEASURE GROUNDS, ETC.

Thames Embankment Grasses. This special mixture has been very successful on the Thames Embankment and various public and private parks around London, and will be found well adapted for renovating or forming new pleasure grounds, Ornamental Parks, People's Parks in large towns, and for enclosures such as Squares in and about London and other populous cities. Three to five bushels are recommended per acre; and for renovating, one to two bushels per acre. Per bushel, 20/- per lb., 1s.

Lawn Grass Mixture for Improving Old Lawns or Laying Down New Ones, Croquet Grounds, and Bowling Greens, 1/3 per lb.; 3/- per gallon; 22/6 per bushel. 3 to 5 bushels, or 60 lbs. to 100 lbs. per acre; 60 lbs. is the quantity usually sown, but if the ground is to be clothed quickly 100 lbs. is recommended.

Extra fine Lawn Grass Mixture for Improving Old Lawns, or Laying Down New Ones, Croquet Grounds, and Bowling Greens, 1/6 per lb.; 3/6 per gallon; 24/- per bushel.

Dutch Clover, Finest White (as no Clover is included in our mixture of Grasses, those who prefer a little should order separately at the rate of 5lb. per acre), per lb., 1/6.

Watson's Weed-destroying Lawn-Sand, for killing daisies, dandelions, plantains, etc., on Lawns, Croquet Grounds, etc. The Lawn Sand is also a rich fertilizer, soon imparting to the Grass a rich emerald-green colour. The Weed-destroying Lawn-Sand has been highly spoken of by those who have used it, and the annually increasing demand for it is the best testimony we can offer of its appreciation. Price in London, 2/6, 5/6, and 10/6 per canister, per 1/2 cwt. 21/-, 1 cwt. 40/-.

AGRICULTURAL SEEDS.

Permanent Pasture Grasses in Mixture, expressly selected to suit the particular soils for which they are required—heavy, medium, or light soils, meadows, or pastures, per acre, 30/-, 35/-, and 40/-, according to quality. The quantity we supply per acre is 2 bush. light and 12 lbs. heavy seeds.

Present Prices of the following, which may vary as the season advances:—

FRENCH VARIETIES OF GLADIOLUS GANDAVENSIS.

In the following list of Gladioli, the most desirable varieties are quoted. The descriptions give the predominating colours, and the varieties are arranged in groups according to their colour, to assist purchasers in making their selection.

We feel it important to add that we annually discard those which have been superseded by better sorts, or where the distinction is not sufficiently marked. This elimination is the result of annual experiments at our sample grounds.

CULTURE.—Trench the ground as deep as the soil will admit, intermingling as the work proceeds abundance of rotten manure, and plant the roots at a depth of 6 inches.

TIME OF PLANTING.—From the middle of April to the beginning of June we consider the best time to plant, and when one planting only is made, we should recommend early in May, but for successional plantings commence middle of April, and continue fortnightly till the middle of June.

PLANTING TO ADVANTAGE.—Groups of three to a dozen roots planted in the flower borders in distinct or diversified colours, produce an exceedingly fine effect. Plant the roots 4 inches from each other, and when sufficiently advanced place a stake in the centre, and fasten the plants to it.

In the first Division we give the Crimson, Scarlets, and deep shades of Red; in the second, the light Scarlets, the warm soft shades of Red, and the Roses shading to Salmon; in the third, the Purples and those which are Mottled Purple; in the fourth, the Whites, and Blushes, and in the fifth, the Yellows.

For convenience the prices are quoted for one bulb, but if ordered by the dozen, those offered at 4d. each will be charged per dozen, 3/6; 6d., 5/6; 9d., 7/6; 1/-, 10/6, and so on.

GLADIOLUS ROOTS, VARIETIES OF GANDAVENSIS.—Our own Selections.

It is impossible to over-estimate the decorative value of these splendid varieties of Gladiolus. In groups in the flower garden, they are noble plants, to cut for furnishing vases they are exceptionally fine, and they last quite as long in water as on the plant. The unopened blossoms expand perfectly in water, and the bright colours are softer and the whites purer when opened indoors. The selections quoted, we strongly recommend to purchasers.

LILIUM. (Lilies.)

Culture out of doors.—The Lily in its native habitat, is found growing amongst brushwood, long grass, on the margins of plantations, or in ravines, &c., and always where there is more or less shade, and in soil which is sweet and well drained; so that in choosing a situation for planting these, partial shade and perfect drainage should be attended to. The borders of Rhododendron and Azalea beds are found admirably suited for lily culture; they also do well amongst dwarf shrubs, or intermingled with herbaceous plants, and in the proximity of trees. During the past summer we saw Lilium auratum alternated with Roses, in the borders of Rhododendron beds, the stems of the lilies in some cases measuring 3 to 4 inches in circumference, and attaining a height of 11 feet, surmounted with large heads of flowers, with from 50 to upwards of 100 blossoms. As we write this, we have Auratums blooming magnificently under the shade of an old oak tree, and immediately under Standard Mop-headed Acacias, where the light green stems, the fresh coloured foliage, and the finely developed flowers of the Lily, indicate the most robust health. Prepare the ground by loosening the soil to a good depth, intermixing fresh loam, plenty of peat and coarse sand, or leaf soil may be used instead of peat, taking care that soil as free as possible from insect life be used. In this plant the bulbs 6 inches deep, and if the drainage is satisfactory they need not be disturbed for years. Still better, when planting remove the natural soil and replace with the compost named. The bog or swamp-loving Lilies, Superbum, Canadense, and the Pardalinum varieties, succeed best in a moist peaty soil.

Culture In-doors.—The Lily succeeds best in a compost of fibry loam and peat, with plenty of sand, or leaf soil and loam with sand; the top of the bulb should be covered at least one to two inches, and the pots plunged in ashes in a cold frame; or the pots may be placed out of doors, and covered with ashes, as recommended in the culture of the Hyacinth, and there allowed to remain till the plants have speared through, or better still, let them remain till the flower buds are formed, then remove to the conservatory, corridor, or sitting-room. While the Lily is growing, a situation should be selected, or measures taken to prevent the sun's rays falling upon the surface soil. A viney, or the north side of a hedge or wall, are suitable places. Lilies grown in pots, should have liquid manure twice a week, and the drainage must be perfect and the soil kept sweet. Superbum, Canadense, and Pardalinum varieties, succeed best in sandy peat.

The Lily is a matchless plant for indoor decoration, and is unequalled for its decorative effect in large conservatories, glass corridors, &c.

We have arranged the Lilies in accordance with Mr. Baker's classification, which is a natural grouping based on the shape of the flower; these groupings with a few exceptions, represent also the order of flowering. Purchasers therefore selecting from each group, secure both diversity of form and succession of bloom.

3005	Takesimense (true), pure white, very large flowers, 2 ft.	2 0
3006	" foliis argenteo-marginatis, white, leaves marginated silvery white, 1½ ft.	21 0
3007	Nepalense, pure white, outside suffused purple towards the base	63 0
3008	Neilgherrense. The flowers of this magnificent Lily are of great size, substance, and deliciously fragrant; they measure 9 to 12 inches in length, and are large in proportion, the prevailing colour is white, tinged primrose. The plant is of a free robust growth, and admirably adapted for conservatory decoration. It comes from the Neilgherries at a high elevation, where it is found growing with from 5 to 7 flowers on a plant: it is the hardiest and best of the Indian lilies. From the consignment received in January, 1876, some flowered in pots as early as July, and others as late as November. From the general appearance of this Lily we felt confident it would be found hardy in England, and planted some out as a trial test, and we find that those planted exposed to the full sun, are growing vigorously, and give good promise of success. Our stock of healthy bulbs is large, and has been in our possession since January, 1876, and are quoted at very moderate prices, considering the magnificence and rarity of the Lily. As a conservatory plant it cannot be too strongly recommended.	each 3/6, 5/6, 7/6, 10/6, 15/-, & 21 0
3009	Wallichianum, white; Mr. Baker designates this "The Prince of the Longiflorum Series," an extremely handsome and very rare Autumn-flowering indoor Lily, 4 ft.	5/6, 7/6, 10/6, 15/-, & 21 0
3010	Washingtonianum, white, shading to lilac, 3 ft.	5/6, 7/6, & 10 6
3011	" purpureum, white, evenly spotted black, 3 ft.	7/6, 10/6, & 15 0

MARTAGON GROUP.

Flowers with the divisions of the perianth rolled back like a Turk's Cap, and one or other of the species enumerated are in flower from May till end of August.

		each—s. d.
3012	Albanum, light yellow, sweet scented, introduced by Mr. Leichtlin, 1875	5 6

3049	" pyramidalis, differing from No. 3048 in the flower spike being more pyramidal, 4 to 7 ft.	2	0
3050	Tenuifolium, rich scarlet, a beautiful miniature species, very rare, 1½ ft.	3/6 &	5
3051	Testaceum, syn. excelsum, delicate apricot, delightfully fragrant, 4 ft.; per doz. 10/6 & 15/6; each 1/ &	1	6

ARCHELIORION GROUP.

Flowers reflexed, horizontal or slightly drooping; flowering from July to September.

THE AURATUM. White, spotted, and with a gold band down the centre of each petal. The variation in this Lily is endless. Some have small, others medium, and some have enormous flowers. The gold band in some is faint, in others very conspicuous. In some the spots on the white ground are very profuse, while in others they are comparatively few. Some of the varieties have large spots, and others have the spots small, but Virginale has pale primrose spots and a faint yellow band; the generality have the spots either rose, scarlet, or purplish. And what is noteworthy in this Lily, some bloom in July, others in August and September. We are noting the times of blooming, so that purchasers can have bulbs which have bloomed at the periods above stated.

3052	Auratum, Ex. 3 ft.	each 1/6, 2/6 &	3	6
3053	" Ex. Ex. 3 ft.	" 2/6, 3/6 &	5	6

3057	" Virginale, white, golden band, 3 ft.	each 2/	0	0

SPECIOSUM (or more usually though erroneously called Lancifolium) naturally divides itself into two distinct sections, which are distinguishable by the coloration of the stem.

1. Rubrum is characterised by the stem being brownish, ranging to purplish black, the green of the foliage deepening pro ratio with the colour of the stem. Rubrum verum has a purplish black stem.
2. Roseum is characterised by the stem being brownish, ranging to light green, and the shade of the foliage pro ratio with the green of the stem. Roseum verum has a pale green stem.

3086	splendens, bright orange-scarlet, covered with large crimson spots, 6 ft.	1/- & 1 6

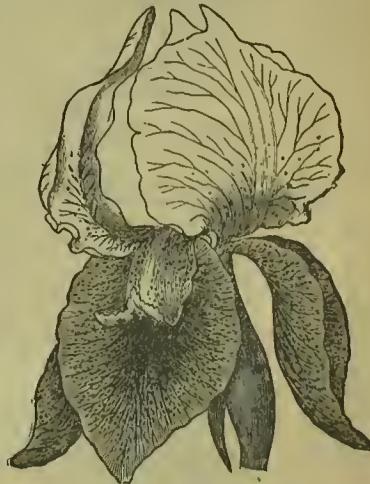

A DOUBTFUL LILY.

Botanists have not yet decided whether the following is a Lily or a Fritillaria. Whatever the ultimate verdict may be, it will not detract from the decided beauty of the plant, which throws up a long spike of rich rose-purple flowers.

3087	Lilium Thomsomianum, or Fritillaria Thomsoniana	2/6, 3/6, & 5 6
------	---	-----------------

IRIS BARBATA, THE BEARDED IRIS, COMMONLY CALLED GERMAN OR FLAG IRIS.

Our collection of this Section of Iris has been pronounced the most complete in England, and in "THE GARDEN" of Aug. 29th, 1874, a lengthened, classified, and descriptive list is given of the varieties we have flowered. Those we enumerate in this list are a selection from upwards of 200 varieties. The better to understand our descriptions, we furnish a woodcut, and it will be observed from it that three of the petals are erect—these are called *standards*; the other three droop—these are called *falls*. The small tongued parts of the flower are the *petaloid stigmas*, under which run the "beards." The flowers in this Section are all large and very handsome, more or less beautifully mottled in the standards, and reticulated in the falls; the beards ranging from delicate primrose to orange, and the petaloid stigmas frequently enhancing the general effect by their contrast of colour. We furnish these important particulars that our descriptions may be the better understood, as we have not attempted to take in these individual points, but to deal with the colours which strike the eye on first looking at the flower. There is no flower, however, that so improves by examination. At first sight its beauty is equal to the Orchid, but, on closer examination, we have no hesitation in saying it possesses points of interest surpassing the finest Orchid. In colours there are the richest yellows, the intensest purples, the most delicate blues, the softest mauves, and the most beautiful claret-reds. There are whites, and primroses, and bronzes of every imaginable shade—indeed, language fails us in picturing the beauties of this flower; and, consequently our descriptions fall far short of the reality; and this will be readily understood when we state that there may be found in almost any one of the flowers from 10 to 20 different shades harmonizing and blending in such a manner as to make one perfectly enthusiastic. Those who have not used this Iris for surrounding artificial lakes and ponds, or grown it in the flower borders, shrubberies, and woodland walks, should do so. It is also most valuable wherever a large quantity of cut flowers is required from May to July, as plants when established, will, with good cultivation, increase in size annually till they attain large proportions, each plant yielding 50 to 100 spikes of bloom.

In the descriptions *S.* is used to signify *Standards*, or the erect petals; *F.*, *Falls*, or the drooping petals.

We have arranged the Iris Barbata in natural groups to facilitate amateurs in making selections. Each group has a distinctive characteristic. Germanica flowers first, and is represented by the blue, purple, and white Flag Iris of our gardens; they flower at the same time, and are extremely decorative in May. Aphylla embraces the species Plicata and Swertia; the Standards have a frill-like appearance arising from the marginal coloured transverse lines on a white ground. Amoenia has the standards white, or approaching to white. Neglecta has the standards purple, or approaching to purple. Pallida has the standards ranging from pale lavender to rose-lilac. Squalens embraces those with the standards bronzed; and Variegata has the standards invariably yellow.

	s. d.

SUNDY SPECIES OF BEARLESS IRIS.

Under this heading we enumerate a few species of Iris more or less rare and beautiful. Amongst the most noteworthy, *I. Iberica*, ranks foremost, it is of dwarf growth, with large and beautiful flowers, in which are curious combinations of colour. Our illustration, page 19, represents the flower of this plant. *Cristata*, with its amethystine flowers and close dwarf growth, succeeds best in well-drained borders or on rockwork. *Susiana*, has large flowers of rare beauty. *Sibirica* is distinguished by its long narrow leaves and small orchid-like flowers, *Stylosa* by its winter blooming, *Sanguinea* by its lovely coloured flowers, *Ruthenica* by its dwarf fan-like foliage, and *Tuberosa* by its fantastic flowers in March; while *Versicolor* and *Virginica* are remarkable for their dwarfed growth, and neat, beautiful flowers, which are admirably adapted for small bouquets, finger glasses, etc. Thus we might describe each of those enumerated.

IRIS PUMILA OR DWARF IRIS.

Charming varieties, growing from 6 to 12 inches high, and in flower during March, April, and May. For groups in small borders, and as edgings to Rhododendron beds, herbaceous borders, etc., they are invaluable, succeeding in almost any soil and situation. The permanency of the blossom is enhanced however, in places where they are slightly protected from cutting winds and hot sunshine.

IRIS KÄMPFERI, JAPANESE FLAG IRIS.

These new Japanese Iris are truly magnificent, and are a perfectly distinct race. They have large flat Clematis-like flowers, 5 to 7 inches in diameter. The colours are rich and beautiful, and in many diversified shades, from pure white to rose, and from rose to the richest blues and purples, tinted, shaded, and blotched, and frequently elaborately veined, each petal having a distinct orange spot more or less conspicuous. The foliage of the plant has a spreading fan-like-outline, which is very pleasing.

On the 3rd of July, we exhibited a group of seedlings at the fortnightly meeting of the Royal Horticultural Society, and were awarded three First-class Certificates, as follows:—*Alba grandidissima*, ivory white, spotted orange; *Robert Parker*, grey lilac, heavily flaked crimson-purple; *Mrs. Barr*, delicate lavender, beautifully netted lilac, and blotched orange. Many grand varieties had passed out of bloom before we had the opportunity of submitting them to the Floral Committee, and also since the exhibition. We, however, have great pleasure in offering these new seedlings, which we received from our friend Max Leichtlin, Esq., of Baden-Baden. They are an important addition to these popular garden favourites, and what is of great importance, these seedlings flower as freely as the other races of Iris. The * indicates the new varieties.

CULTURE.—Remove the natural soil, and replace with sandy peat and leaf mould, encourage a free growth during summer, and when the plants are fairly established they will flower profusely.

3268 Our own selection, 6 in 6 varieties of Iris Kämpferi 9s., 12s., 18s., and 30s.

3340 Greenhouse amaryllis in mixture, 2s. 6d. and 3s. 6d. each.				

FUNKIA.

These are fine hardy ornamental border plants, pushing their leaves early in Spring, and in Summer throwing up a profusion of beautiful Lily-like spikes of bell-shaped flowers. The species Sieboldiana and Subcordata grandiflora are remarkable for their exceedingly handsome foliage, and are largely used in beds as fine foliage plants and as edgings to sub-tropical beds. Sieboldiana has large glaucous green leaves; Subcordata grandiflora has ornamental, large, light fresh green foliage, and in autumn throws up grand spikes of pure white flowers, rivalling the Stephanotis. For edgings to beds, *Ovata aurata maculata elegantissima*, *argentea marginata*, *lanecolata*, *plantanifolia*, and *viridis*, should be freely used; while for beds of smaller dimensions, edgings of *Ovata spathulata*, *aurea undulata variegata*, and *aurea* will be found most suitable. In mixed flower borders all the Funkias are valuable plants, while in semi-wild places, the large foliaged varieties are highly ornamental, planted in the grass. As a conservatory plant, the Funkias are all desirable, being equally ornamental in flower and foliage.

HEMEROCALLIS (THE DAY-LILY).

These are fine ornamental border plants. The double varieties *Kwanso* and *Disticha*, are very handsome. The rich yellow varieties, *Flava*, *Graminea*, and *Thunbergi*, are dwarf neat growing plants. The variegated forms of *Fulva* and *Kwanso* lifted and potted in Spring for the conservatory, equal in effect the silver-striped Pandanus.

HERBACEOUS OR PERENNIAL PHLOXES.

These grand border plants are exceedingly decorative, the flowers beautifully formed, and borne in large clusters, varying in colour from the purest white to the richest purple, brilliant salmon and crimson; and many of the flowers are beautifully margined, while others have conspicuously coloured centres. Cultivated like the Chrysanthemum, in pots, the Phlox makes beautiful specimens for conservatory decoration.

PÆONIAS SINENSIS VARIETIES, Etc.

These take first rank among herbaceous and decorative plants; they are free and stately in growth, and produce in great profusion large elegantly turned flowers of the most delicate and beautiful shades of colour, many of which are very fragrant; they are perfectly hardy, and will flourish in any ordinary garden soil, enriched with manure.

DELPHINIUMS.

A valuable class of hardy perennial Larkspurs, varying in height from 2 to 6 feet. Amongst the colours are bright scarlet, pure white, pale lavender, and every shade of blue, from azure to deep indigo, and some almost black, these again have frequently white, brown, or black centres; the flowers differ considerably in form and size; there are singles, semi-doubles, and others perfectly double with beautifully imbricated flowers, the spikes of bloom varying from 1 to 3 feet in length. The plants may be cultivated in any ordinary garden soil.

DOUBLE POTENTILLAS.

A very distinct and beautiful class of hardy perennials, with finely formed very double flowers; the petals are of a stout, rich, velvety texture, and vary in colour from brilliant crimson and maroon to rich orange and bright yellow. These colours are in some flowers represented by stripes, in others by spots, margins, or marbling. The flowers are produced in great profusion and for many weeks in succession.

Orders received for the above will be executed direct from the manufactory.

THE IMPROVED PAXTON FUMIGATOR.—Those who dislike the disagreeable process of fumigating houses in the ordinary way will find the Paxton Fumigator to be all they could desire. It is simple and efficacious. The nozzle, cylinder, and inner gratings are cast in brass, and will stand any reasonable amount of heat; the bellows are strong and well made. The operator has simply to insert the nozzle through a small opening, and gently work the bellows till he has filled the house with smoke. When fumigating a single plant, screw on the brass tube to the nozzle, and by that means scorching the foliage will be avoided. Price, including stained wooden case, 20s.

BARR'S PORTABLE GARDEN ENGINES. No. 1, 50/-; No. 2, 42/-.—No. 1 will throw a continuous stream of water 40 feet, and through a $\frac{1}{2}$ -inch suction-hose draw its supply from a distance of 60 feet. No. 2 will draw water from a distance of 30 feet through a $\frac{1}{4}$ -inch hose. These engines are constructed on the best principles. They are not liable to get out of order, while their value for washing wall fruit trees, cleansing hops, and watering flower-beds, etc., cannot be overestimated.

Extra hose, $\frac{1}{2}$ -inch, 1s. 6d. per foot run.
 $\frac{1}{4}$ -inch, 1s. 3d. per foot run.

BARR'S HEATED FRAMES.
For Raising Seeds and Striking Cuttings.

It is impossible to over-estimate the value of these frames; they take the place of a stove or forcing-house, and where one of these is at work a dung frame is unnecessary, as a sufficient supply of seeds may be raised and cuttings struck to furnish a moderate sized garden. The frame is heated by a Paraffin lamp.

No. 1. 23 by 17 in., on Stand, 90/-; on Dwarf Ft., 84/-.
No. 2. 29 by 20 in., on Stand, 98/-; on Dwarf Ft., 92/-.
No. 3. 35 by 23 in., on Stand, 105/-; on Dwarf Ft., 98/-.
